At the cross Christ made possible a "divine exchange" for everyone who believes in him. What is this exchange? Because Jesus endured all the evil due to humankind, believers can actually partake in all the good due to him. In this meaty book, acclaimed scholar Derek Prince explores the astounding results of the atonement for followers of Christ. In place of punishment, wounding, death, poverty, shame, and rejection, Christ freely offers forgiveness, healing, life, abundance, glory, and acceptance. In addition, Prince gives biblical grounding for five areas of deliverance that are made available through the cross: deliverance from this present evil age, from the law, from self, from the flesh, and from the world. This brand-new edition includes a new mini-study course at the end of each chapter, perfect for individual or small group study.

As a child, Philip Sherlock loved to listen to folk tales. Since then he has made a significant contribution to Caribbean folklore by recording many of them in print for the first time. Here are fables of the birds and animals of the West Indies: jaguar, snake, crested curassow, wild pig, parrot, wise owl, and of Anansi--the spider who can assume human form. These twenty-one stories are a wonderful mixture of early tales from the Arawak and the Carib people, the original inhabitants of the Caribbean, and from

the Ashanti people of West Africa. Read together they help to provide a background to the history of the West Indies. The stories are retold here in a warm, rich style--some tales gentle and philosophical, some humorous and full of action.

There are many ways of designing a motorcycle, but it takes a great deal of artistic sensitivity to create a legend from only two cylinders. That is exactly what Moto Guzzi, the prestige manufacturer in Mandello del Lario, has done. Active in

motorcycle construction since 1920, particularly in the years after 1945 it created motorcycles that made history, especially those with the powerful V-twin engine installed lengthwise in the chassis. For forty years the V-twin four-stroke engine has been the Italian company's flagship. The fine Italians, Le Mans, and California types, and the small 125s, 250s and 350s are described here with accuracy and detail. This comprehensive volume describes all models and technical details. As is the style of the authors, they also provide background information about the company and the industry. It is not all about machines and horsepower, but also the people who put their stamp on the operations: not only a treat for fans of serious technical information, but a gripping story as well.
