For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

This thorough account of the South's efforts to hold the Mississippi River is "fast-paced, easy to read, and well supported by archival research" (The Civil War Monitor). Most studies of the Mississippi River focus on Union campaigns to open and control it, while overlooking Southern attempts to stop them. This book tells the other side of the story—the first modern full-length treatment of inland naval operations from the Confederate perspective. Jefferson Davis realized the value of the Mississippi River and its entire valley, which he described as the "great artery of the Confederacy." This was the key internal highway that controlled the fledgling nation's transportation network. Davis and his secretary of the navy knew these vital logistical paths offered potential highways of invasion for Union warships and armies to stab their way deep into the heart of the Confederacy, and had to be held. They planned to protect these arteries of rebellion by crafting a ring of powerful fortifications supported by naval forces. Different military branches, however, including the navy, marine corps, army, and revenue service, as well as civilian privateers and even state naval forces, competed for scarce resources to operate their own vessels. A lack of industrial capacity further complicated Confederate efforts and guaranteed the South's grand vision of deploying dozens of river gunboats and powerful ironclads would never be fully realized. Despite these limitations, the Southern war machine introduced many innovations and alternate defenses including the Confederacy's first operational ironclad, the first successful use of underwater torpedoes, widespread use of army-navy joint operations, and the employment of extensive river obstructions. When the river came under complete Union control in 1863, Confederate efforts shifted to its many tributaries, and a bitter, deadly struggle to control these internal lifelines. Despite a lack of ships, material, personnel, funding, and unified organization, the Confederacy fought desperately and scored many localized tactical victories—often at great cost—but failed at the strategic level. Written by a former Navy Surface Warfare Officer, this study, grounded in extensive archival and firsthand accounts, official records, and a keen understanding of terrain and geography, "very astutely gets to the heart of the main internal factors that lay behind the CSN's catastrophic failure to defend the strategic waterways of the Mississippi River Valley" (Civil War Books and Authors).

The Indian Constitution is the largest written constitution that guarantees equality to women and empowers the State to take affirmative actions in favour of women. India has adopted International conventions for protection of rights of women and granting them equality and ratified the Convention on Elimination of All Forms of Discrimination Against Women (CEDAW) in the year 1993. The National Policy for Women Empowerment was presented in 2001, the goal of that policy to bring about the advancement, development and empowerment of women and enable women to become financially independent. Currently, India is the only country where

the economic gender gap is larger than the political gender gap. Women are required to understand their own potential and overcome social barriers. With constant support of the government, change in stereotype mindset and skill development in women, India will continue witnessing gradual increase in women entrepreneurship in future. The aim of this book is to show the latest state of knowledge on the topic of women entrepreneurship, the role of women in business and women empowerment in India. Many aspects relating to role of women in business, sustainable business development and aspects going beyond economic empowerment of women are discussed in addition to presenting legal and regulatory frameworks.
