If you find, as you grow older,
that the world is becoming
more baffling - indeed, more
disturbing - by the day, be
assured you are not alone.
Countless millions in your age
bracket around our planet are
experiencing similar feelings.
In fact, they've been doing so
for some years. To suggest,
then, that the publication of
The Challenges of Ageing is
timely, might well be an under-
statement. After all, technical

experts have, for over a decade
now, been documenting the
staggering impact population
ageing is having on the very
structure of human existence. It
has been noted, for instance,
that a large number of
developed countries are
experiencing ageing population
impacts never before
encountered in human history.
A United Nations study on the
subject estimates that the
number of older persons
worldwide tripled in a 50-year
period to the year 2000. It will
have more than tripled again by
the year 2050. The impact on
everyday living for older
generations is massive.
Unsurprisingly, an immense
volume of related statistical
reports on the subject is widely
available. Decidedly less
available, however, is down-to-
earth information focussed on
achieving rewarding ageing
lives within these ever-
intensifying environments. Co-

authors of *The Challenges of Ageing, counselling psychologist, Maria Carmen Navarro, and novelist/historian, Norma Miraflores*, have skilfully targeted this critical area of need. The result is a book for which there will surely be wide demand. Far from being yet another statistical study, *The Challenges of Ageing* provides an absorbing account on coping with difficulties as the years roll on. It can be read, initially, for an overall appreciation of the ageing phenomenon. Thereafter it can be kept for valuable ready reference as life progresses.

 Technical Manual Operator's Manual for Generator Set, Skid Mounted 5KW Advanced Medium Mobile Power Sources (AMMPS) MEP-1030 50/60 Hz (NSN: 6115-01-561-7329) (EIC: N/A) MEP-1031 400 Hz (NSN: 6115-01-561-7438) (EIC: N/A) This manual contains operator instructions for the AMMPS 5 kilowatt (kW) generator sets, Mobile Electric Power (MEP)-1030 (50/60 Hertz (Hz)) and MEP-1031 (400 Hz). This operator's manual provides operating procedures, troubleshooting, PMCS, maintenance, and supporting information required to operate and maintain the AMMPS 5 kW generator sets. Listed below are some of the features included in this TM to help locate and use the provided information. This TM has been organized using the Work Package (WP) concept. Each chapter contains a series of WPs rather than sections and paragraphs. Each WP is designed to stand alone as a complete information module. If you keep the section(s) of this TM in a loose-leaf binder, you will be able to remove just the WP needed to complete a specific task. Each WP is numbered using a four-digit number beginning with WP 0001. WPs are numbered sequentially throughout the TM (e.g. WP 0022, WP 0023, etc.). The Table of Contents lists each chapter and WP title, as well as all figures and tables contained within each WP. Figures and tables are numbered sequentially within each WP. The WP number is located at the top right of each page. It is also located at the bottom of the page with the WP page number included (0001-1 would be page 1 of the General Information WP (WP 0001, General Information)). Each WP starts on a right-hand page. This is done so you can remove a single WP from the paper TM if needed for a task. Blank pages are assigned a number, but it appears on the preceding or following page. For example, if page 0001-10 of a WP is blank, page 0001-9 will have the number 0001-9/10 blank; or if page 0001-1 of a WP is blank, page 0001-2 will have the number 0001-1 blank/2. Each WP containing step-by-step maintenance or troubleshooting

procedures will end with the words END OF TASK, and each WP ends with the statement END OF WORK PACKAGE. Think of each WP as a small, standalone TM.
