Written to provide information on all price ranges of equipment to everyone from the beginner to the experienced home theater owner, *Build Your Own Home Theater* has been completely updated for today's audience. This new edition contains valuable consumer information on the latest digital home theater components and technology, including digital surround sound receivers, DVD players, digital television & HDTV, digital satellites (DBS), digital camcorders, and digital hard-drive video recorders. It also features easy-to-understand explanations of surround sound technology and set ups-including Dolbyâ Digital, THX Surround EXTM, and DTS-ESTM. If you are interested in audio, video, and home theater technologies, this book will give you the information you need to choose the right components, hook the pieces together, and create a fabulous theater experience right in your own living room. When the first edition of *Build Your Own Home Theater* was published, decent home theater systems were primarily only affordable for wealthier consumers. Now, several years later, the technology is accessible to millions of homes as products such as wide-screen televisions, digital surround sound audio,

DVD Video and Audio Players, and digital satellite systems have become commonplace. Though most people don't have actual home theater set-ups in their living rooms, more and more consumers are trying to combine components they already own with new high-tech components to create an affordable home theater experience. Complete with important home theater Web site addresses and resources, *Build Your Own Home Theater, Second Edition* is a comprehensive, current, and well-researched text. Beginners to advanced home theater consumers, Videophiles, technicians, engineers, and electronics hobbyists from all walks of life will especially find it invaluable. *"Dolby" and the double-D symbol are registered trademarks and "Surround Sound EX" is a trademark of Dolby Laboratories. THX and Lucasfilm are © Lucasfilm Ltd. & TM. All rights are reserved. Used under authorization. DTS and DTS-ES are trademarks of Digital Theater Systems, Inc. Covers all of the hot digital technologies and how to tie them together into one amazing home theater experience for budgets from \$1,500 to \$15,000. New edition includes cutting edge technology from Digital Surround Sound to High Definition and Digital Television, DVD, Video Hard-Drives, Digital Satellites, and much more

Wireless Home Networking For Dummies even gives you a look into the not-so-distant future and the wireless wonders in the works! <u>The Sound Reinforcement Handbook</u> Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave. <i>Customs Bulletin and Decisions</i> Sound engineering is one of the fastest-growing branches of music production. The need for a broad-based discussion on the issues constituting the art of sound engineering persists and loses none of its relevance, revealing that sound engineering should not be investigated only in the mathematical and physical context (musical acoustics) or</p> | <p>the engineering aspect (signal processing and modification). Publications targeted primarily at musicians are few and far between, which is why the mutual understanding for different priorities which effectively concern the same issues faced by the engineer, the acoustician and the musician, seems to be a complex problem and the main concept explored in this publication. This book is intended for musicians or sound directors, but also acousticians and sound engineers wishing to learn how the musicians think. The monograph is also addressed to musicians who intend to record their material in the studio in the near future, but do not possess knowledge on studio construction, studio workflow or the art of recording. It seems important to familiarize the musicians with the reality that awaits them on the other side of the glass, thus fostering their responsibility for the work jointly produced by them – entering the studio – and the sound director.</p> |
