This is an updated and newly revised edition of the classic book *The Art of Photography: An Approach to Personal Expression*. Originally published in 1994 and first revised in 2010, *The Art of Photography* has sold well over 100,000 copies and has firmly established itself as the most readable, understandable, and complete textbook on photography. Featuring nearly 200 beautiful photographs in both black-and-white and color, as well as numerous charts, graphs, and tables, this book presents the world of photography to beginner, intermediate, and advanced photographers who seek to make a personal statement through the medium of photography. Without talking down to anyone or talking over anyone's head, renowned photographer, teacher, and author Bruce Barnbaum presents how-to techniques for both traditional and digital approaches. In this newest edition of the book, Barnbaum has included many new images and has completely revised the text, with particular focus on two crucial chapters covering digital photography: he revised a chapter covering the digital zone system, and includes a brand-new chapter on image adjustments using digital tools. There is also a new chapter discussing the concepts of "art versus technique" and "traditional versus digital" approaches to photography. Throughout the book, Barnbaum goes well beyond the technical, as he delves deeply into the philosophical, expressive, and creative aspects of photography so often avoided in other books. Barnbaum is recognized as one of the world's finest landscape and architectural photographers, and for decades has been considered one of the best instructors in the field of photography. This latest incarnation of his textbook—which has

evolved, grown, and been refined over the past 45 years—will prove to be an ongoing, invaluable photographic reference for years to come. It is truly the resource of choice for the thinking photographer. Topics include: • Elements of Composition • Visualization • Light and Color • Filters • Black-and-White • The Digital Zone System • The Zone System for Film • Printing and Presentation • Exploding Photographic Myths • Artistic Integrity • Realism, Abstraction, and Art • Creativity and Intuition • A Personal Philosophy • And much, much more...

New York Times bestselling author Laura Lippman's Tess Monaghan must put her PI skills to the ultimate test when she falls into the crosshairs of a psychopath who knows everything about her. For the past fifty years on the birth date of Edgar Allan Poe, a person wearing a cloak has placed three roses and a half bottle of cognac on the writer's gravesite. PI Tess Monaghan has never witnessed the event. But when John P. Kennedy, an eccentric antiques dealer, asks her to uncover the identity of the caped visitor, who he believes has duped him with the sale of an inauthentic antique, Tess decides to hold vigil on the night the cloaked stranger is expected to make an appearance. But the custom takes on a bizarre, fatal twist when two cloaked figures arrive. The imitator leaves his tribute and then makes his escape...after shooting the first visitor. Warning bells tell Tess to steer clear of this case. But when roses and cognac appear on her doorstep, Tess's curiosity is piqued. She soon discovers that John P. Kennedy has vanished into thin air and much of what he told her was questionable. Then the identity of the shooting victim comes to light, and all clues seem to point to the possibility he was the target of a hate crime. But Tess isn't convinced. What was his connection to the decades-long Edgar Allan Poe tradition and to the killer? When more cryptic clues are left at her home, Tess realizes that someone is watching her every move...someone who's bent on killing again.

Livestock are the domesticated animals that are raised in an agricultural setting for the production of labor and commodities such as milk, meat, fur, leather and wool. The branch of agriculture which deals with the raising, selective breeding and maintenance of livestock is termed as animal husbandry. It is necessary to maintain animal health to maximize the production of livestock and the products derived from them. Livestock management also includes the control, treatment and prevention of diseases which can be caught by livestock such as foot and mouth disease, classical swine fever and scrapie. The farming practices in livestock management are broadly classified as intensive or extensive. Intensive livestock farming involves housing animals in high density conditions, focusing on maximizing output while minimizing costs.
