Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a

training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is

---

meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

The Second Formation of Islamic Law is the first book to deal with the rise of an official school of law in the post-Mongol period. The author explores how the Ottoman dynasty shaped the structure and doctrine of a particular branch within the Hanafi school of law. In addition, the book examines the opposition of various jurists, mostly from the empire's Arab provinces, to this development. By looking at the emergence of the concept of an official school of law, the book seeks to call into question the grand narratives of Islamic legal history that tend to see the nineteenth century as the major rupture. Instead, an argument is formed that some of the supposedly nineteenth-century developments, such as the codification of Islamic law, are rooted in much earlier centuries. In so doing, the book offers a new periodization of Islamic legal history in the eastern Islamic lands.
