I was the woman who believed in fairy tales; he was the monster of them. The Devil of Ravenscliff Manor. The Phantom. Radcliff. Escorted by a prince, my obsession led me to the villain's lair, with no hope for rescue. Trapped inside his greenhouse, our once upon a time began with a flower. More accurately, with a scent that captivated me. I signed my soul over to the man who represented my sinister nightmares. The one known to belong to the cruel shadows, who offered me my perfumer's dream. He demanded the impossible: the missing piece of his kingdom of sins. I stalked the impossible: his humanity. This is our dark tale. When beauty met ugliness. When light met darkness. When heaven met hell. A tale of obsession.

After VE Day in 1945 the British population returned enthusiastically to the road. But the cost and availability of both vehicles and fuel led to the post-war scene being dominated by motorcycles, most of them ex-military machines, eagerly snapped up for everyday use in an age

when a family car remained just a dream for many. The British industry, meanwhile, was exhorted to 'export or die', and until well into the 1950s the majority of new British bikes were sold abroad. During this period, the industry - the largest and most important in the world - continued to develop new and exciting machines, which increasingly populated Britain's roads. Mick Walker tells the story of the British post-war motorcycle during this golden age of the industry.

Machines from the big names, AMC (AJS and Matchless), the BSA Group (BSA, Triumph, Sunbeam and Ariel), Douglas, Norton, Panther, Royal Enfield, Velocette and Vincent, are here plus a myriad of smaller firms such as Cotton, Excelsior, Francis-Barnett, James and Scott. With the help of archive photographs and advertising material this book conjures up a lost age of the British bike.

This book deals with the whole range, giving the history of all the models, and also describes the restoration of a 1969 Trophy T100C.

328 pages, 186 black & white illustrations, size 5.5 x 8.5 inches. This is a faithful reproduction of the 1962 Floyd Clymer U.S.A. Edition of the same title. While the primary focus of this publication utilizes 1960's and prior motorcycles as examples, the reader is reminded that engineering theory and the laws of physics do not change and as such, the information it contains is still relevant today. Consequently, this publication is indispensable to those either contemplating modification to a current model or the construction of a 'special' for any form of motorcycle competition. Predominantly a technical work, it is written in terms easily understood by the layman. While it includes geometry and math formulae the reader will be aptly rewarded if they take a moment to comprehend the significance of the examples. Consequently, 'Motorcycle Engineering' is considered by many knowledgeable motorcycle enthusiasts to be the best book ever written on how to construct, improve, modify and fine tune a

motorcycle from the 'ground up'. It is our pleasure to offer this reprint to all motorcycle enthusiasts worldwide.
