Design Elements:

Propeller Sizes are given in a set of numbers, e.g. 13x17 or 19x23 usually labeled on the propeller. The first number is the Diameter (width of the circle of the blades) and the second is the Pitch (theoretical travel distance of the angled blades in one revolution).. Two other design features include Rake and Cup. These elements are not labeled on the propeller.

## Yamaha Outboard OEM Propeller Guide | Crowley Marine

A large diameter propeller can push more water than a small diameter propeller, creating more power.

Diameter is predetermined by the manufacturer for a family of products. Your prop selection will be focused on the pitch. Pitch is the distance the propeller will move the boat after one revolution (not accounting for slip).
