Yamaha Propellers | Yamaha Online Parts

Design Elements: Propeller Sizes are given in a set of numbers, e.g. 13x17 or 19x23 usually labeled on the propeller. The first number is the Diameter (width of the circle of the blades) and the second is the Pitch (theoretical travel distance of the angled blades in one revolution).. Two other design features include Rake and Cup. These elements are not labeled on the propeller.

Propeller Fit Guide - Go2marine

If the RPM is below the recommended operating range, switch to a propeller with lower pitched blades. If the RPM is higher, switch to a propeller with higher pitched blades. Each inch of pitch size will change the RPM by 150-200 RPM. Aim for the midpoint or higher of the recommended operating range.
