From every “ beautiful mornin ’ ” to “ some enchanted evening, ” the songs of Oscar Hammerstein II are part of our daily lives, his words part of our

national fabric. Born into a theatrical dynasty headed by his grandfather and namesake, Oscar Hammerstein II breathed new life into the moribund art form of operetta by writing lyrics and libretti for such classics as Rose-Marie (music by Rudolf Friml), The Desert Song (Sigmund Romberg), The New Moon (Romberg) and Song of the Flame (George Gershwin). Hammerstein and Jerome

Kern wrote eight musicals together, including *Sweet Adeline*, *Music in the Air*, and their masterpiece, *Show Boat*. The vibrant *Carmen Jones* was Hammerstein's all-black adaptation of the tragic opera by Georges Bizet. In 1943, Hammerstein, pioneer in the field of operetta, joined forces with Richard Rodgers, who had for the previous twenty-five years taken great strides in the field of musical comedy with his longtime writing partner, Lorenz Hart. The first Rodgers and Hammerstein work, *Oklahoma!*, merged the two styles into a completely new genre—the musical play—and simultaneously launched the most successful partnership in American musical theater. Over the next seventeen years, Rodgers and Hammerstein wrote eight more Broadway musicals: *Carousel*, *Allegro*, *South Pacific*, *The King and I*, *Me and Juliet*, *Pipe Dream*, *Flower Drum Song*, and *The Sound of Music*. They also wrote a movie musical (*State Fair*) and one for television (*Cinderella*). Collectively their works have earned dozens of awards, including Pulitzers, Tonys, Oscars, Grammys, and Emmys. Throughout his career, Hammerstein created works of lyrical beauty and universal feeling, and he continually strove—sometimes against fashion—to seek out the good and beautiful in the world. “I know the world is filled with troubles and many

injustices,” he once said.

“ But reality is as beautiful as it is ugly . . . I just couldn ’ t write anything without hope in it. ” All of his lyrics are here—850, more than a quarter published for the first time—in this sixth book in the indispensable Complete Lyrics series that has also brought us the lyrics of Cole Porter, Lorenz Hart, Ira Gershwin, Irving Berlin, and Frank Loesser. From the young scribe ’ s earliest attempts to the old master ’ s final lyric— “ Edelweiss ” —we see, read, and, yes, sing the words of a theatrical and lyrical genius.

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as:

- physical principles of various material handling systems;
 - considerations in selecting technically efficient and environmentally friendly equipment;
 - best practices in upgrading and optimizing existing bulk material handling facilities;
 - strategies to select proper equipment in the early phases of a new project.
- Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material

handling find optimal solutions to everyday problems.

This second edition of the best-selling piano pedagogy book provides future piano and keyboard teachers with the essential tools to meet the challenges the next century. Fundamental to every keyboard teacher, the text examines current learning theories, offers a historical overview of keyboard pedagogy, reviews educational materials, and describes specific teaching techniques. It also discusses specific repertoire and technique for beginning, intermediate, and adult students. *The Physics of Musical Instruments* Routledge While the history of musical instruments is nearly as old as civilisation itself, the science of acoustics is quite recent. By understanding the physical basis of how instruments are used to make music, one hopes ultimately to be able to give physical criteria to distinguish a fine instrument

from a mediocre one. At that point science may be able to come to the aid of art in improving the design and performance of musical instruments. As yet, many of the subtleties in musical sounds of which instrument makers and musicians are aware remain beyond the reach of modern acoustic measurements. This book describes the results of such acoustical investigations - fascinating intellectual and practical exercises. Addressed to readers with a reasonable grasp of physics who are not put off by a little mathematics, this book discusses most of the traditional instruments currently in use in Western music. A guide for all who have an interest in music and how it is produced, as well as serving as a comprehensive reference for those

undertaking research in the field.

About Echoes During 2019-2020

I wrote over 300 short poems in a state of both great euphoria and agony, like giving birth to a baby. It's just like an everlasting rainy day and I danced in the wind and rain of poetic melodies,

and wrote down something unexpected. These words are wild flowers blossoming at the end of summer and the pearls of grey traumas. I engraved the bloody fragrance of tabooed love on the pillar of marble stone and witnessed it wither and revive in the torrent of time. There are also endless metaphysical inquiries in my mind and I'm always on the road towards the light of truth which we can only approximately approach. We human beings live and think on the net fabricated by language where we can explore the meanings, values and space of understanding so that we might echo with each other in a subtle and soulful way. Echoes could be ripples on the surface of the blue lake and sound waves flowing from the shell of the ocean. Our heartbeats synchronize and our minds get merged into the one at certain moment of life when words build the bridge, and we breathe with the same rhythm.
