If only he had different blood. Ethan has had to tirelessly change from the age of twelve, just because of his blood. Being the only remaining male left from the royal line, Ethan had to change from his natural instinct of that of an Omega, to that of an Alpha, so that he would act and feel like a King. And so, a secret is born. Since it was critical that only he could take the part of 'King', Ethan was also forced to take a 'chosen' mate, so that he could produce an heir. And so, a forced family is placed. The fact that his 'destined' mate was still out there, was nothing to the one that Ethan calls 'Owen', who seems to act like the real leader. But with these problems, there's more. Again, because of blood, Ethan's life is in trouble with the same thing that had put him into this mess! Then, adding to the troubles, he finally meets his 'destined' mate and they have troubles because of all these troubles. It really is a tangled fate.

In between jostled silver birches - olive - tinted fountains which never reached the light-black spruces with little pale candles on each tip, and nut trees smothered to the neck in dense bracken. he bracken was a

forest in itself, a curving verdant flood of branches, transparent as water by the path, but thick, heavy, secret a foot or two away, where high ferny crests waved above the softly moving ferns, just as the beech tops flaunted above the rest of the wood. The rabbits which crept quietly in and out reared on their hind legs to see who was going by. They pricked their ears and stood erect, and then dropped silently on soft paws and disappeared into the close ranks of brown stems when they saw the child. . She walked along the rough path, casting fearful glances to right and left. She never ran, even in moments of greatest terror, when things seemed very near, for then they would know she was afraid and dose round her. Gossamer stretched across the way from nut bush to bracken frond, and clung to her cold cheeks. Spilt acorns and beech mast lay thick on the ground, green and brown patterns in the upside-down red leaves which made a carpet. Heavy rains had swept the soil to the lower levels of the path, and laid bare the rock in many places. On a sandy patch she saw her own footprint, a little square toe and a horse-shoe where the iron heel had sunk. That was in the morning when all was fresh and fair. It cheered her to see the homely mark, and she stayed a moment to look at it, and replace her foot in it, as Robinson Crusoe might have done, A squirrel, rippling along a leafy bough, peered at her, and then, finding her so still, ran down the tree trunk and along the ground. Her step was strangely silent, and a close observer would have seen that she walked only on the soil between the stones of the footpath, stones of the earth itself, which had worn their way through the thin layer of grass. Her eyes and ears were as alert as those of a small wild animal as she slid through the shades in the depths of the wood...

In 2008, Kevin Matthews, a well-known ABC and CBS radio personality in Chicago, was diagnosed with multiple sclerosis. As the drive-time radio host for seventeen years and also the voice of his sports commentator, Jim Shorts, and other characters, Matthews entertained ten million listeners weekly, sold out every appearance in the Midwest, and performed in front of 65,000 fans at Grant Park. He traveled around the world, met the famous, had babies named after him, and helped countless charities. He entertained hundreds of thousands of people inside prisons, army bases, and backyards. His promotions included comedy jams, a band, barbeque throw downs, and golf outings. Broken Mary is Matthews' story of his early years in radio and stand-up comedy, his successful career, his struggle with MS, his awakening to the dignity of women, and, importantly, his chance encounter with a broken statue of Mary left next to a dumpster and all that happened as a result. Told with Matthews' signature good humor, this confession of the brokenness of mankind is touchingly honest, personally inspiring, and full of hope.

**BION [Believe It Or Not]**, Book #3 of the CUL8R Time Travel Mystery/Romance series. Change the past, Save the future. Four high school friends are able to do two things no one else on the planet can do . . . talk with dead people and time travel to the past. However, Kelly, who lost her phone during their last adventure, is temporarily grounded. She worries that her new friends will time travel without her, leaving her all alone in her new home in Ft. Myers Beach, Florida. But they surprise her on her birthday and soon they are back in Scott's lab, listening to the old radio that Thomas Edison had invented and called "The Telephone to the Dead". As they slowly turn the dial Kelly, Scott, Austin and Zoey hear hundreds of sad, lonely voices of souls that have passed but apparently never moved on, pleading for help. When they first discovered the radio in Kelly's aunt's garage, they had been touched by the cries and pleas coming from its speakers, but they had no way to go back in time to help them. That is, until Scott reveals an invention of his own . . . a time travel app. They've already tested it twice, with both trips being very successful, but not without danger. Even though they returned with a few scrapes and bruises, and even a gunshot wound, they are eager to go on a new adventure and help solve a mystery. A young woman's voice comes through and asks them to find her twin brother, Jesse, who had run away to the circus in 1927, then disappeared and was never heard from again. Going back and living with a circus sounds like fun. Plus an old book

written by his sister provides a glimpse into the past . . . as well as a photo of Jesse, a photo that grabs their attention and sets the girls' hearts racing. They land in a cornfield in Wichita Falls, Texas as the circus is setting up. It doesn't take them long to discover that circus life is not all glamour and fun; it's a lot of hard work. As usual, they jump in and quickly find jobs, places to sleep and new friends. But most importantly, they find Jesse. Now all they have to do is keep him alive. For Zoey and Jesse, it's love at first sight. It's a first romance for both of them and their love blossoms as they travel from city to city. Zoey knows she's too young to settle down and that Jesse is from a different time and culture, but her feelings for him are strong. Her and her friends' time travel mission has taken on a new dimension. Should they be successful and save his life, will Zoey be able to let him go? Is it possible for him to come to 2013 with her? Is it possible for her to stay in 1927 with him? Ultimately, can she give up everything she has in the present for true love in the past? Jesse's talent working with the big cats catches the attention of the Martin Maxwell, the owner of the circus. Maxwell promotes him to the center ring as a replacement for their current lion tamer who is planning on moving up to the Ringling and Barnum & Bailey Circus. Unfortunately, not everyone shares Zoey's love for Jesse and wants him to disappear forever. Kelly, Scott, Austin and Zoey must figure out who wants Jesse dead and stop him or her before Jesse's fate is sealed. Book #1, **OMG [Oh My God]**, a time travel mystery/romance back to 1966 was awarded The Best Young Adult Indie Book in 2013 and was a Finalist in the Beverly Hills Book Awards for 2013. Book #2, **BRB [Be Right Back]**, a time travel mystery/romance back to 1980 was a Readers' Favorite for 2013.

**Multimedia Signal Processing** is a comprehensive and accessible text to the theory and applications of digital signal processing (DSP). The applications of DSP are pervasive and include multimedia systems, cellular communication, adaptive network management, radar, pattern recognition, medical signal processing, financial data forecasting, artificial intelligence, decision making, control systems and search engines. This book is organised in to three major parts making it a coherent and structured presentation of the theory and applications of digital signal processing. A range of important topics are covered in basic signal processing, model-based statistical signal processing and their applications. Part 1: Basic Digital Signal Processing gives an introduction to the topic, discussing sampling and quantization, Fourier analysis and synthesis, Z-transform, and digital filters. Part 2: Model-based Signal Processing covers probability and information models, Bayesian inference, Wiener filter, adaptive filters, linear prediction hidden Markov models and independent component analysis. Part 3: Applications of Signal Processing in Speech, Music and Telecommunications explains the topics of speech and music processing, echo cancellation, deconvolution and channel equalization, and mobile communication signal processing. Covers music signal processing, explains the anatomy and psychoacoustics of hearing and the design of MP3 music coder. Examines speech processing technology including speech models, speech coding for mobile phones

Me And My Piano Part 1 takes the young pianist step-by-step through the early stages of piano technique, first with separate hands, then with a sequence of very easy pieces for hands together. All use a constant five finger hand position in the key of C major. Games and puzzles give elementary theory a new lease of life, and children will love the rhymes and songs introducing characters such the Ostrich, Sammy Squirrel and the Old Man with the Beard! Fanny Waterman and Marion Harewood's Me And My Piano series is probably the UK's most widely-used and biggest selling piano method. It is now published in a new edition including a new larger size, improved layout making it easier to read, a clean new look with new typesetting and music-setting and the instantly recognisable cover designs have been updated for extra vibrancy. Enchantingly illustrated, in full-colour throughout, this essential and irresistible book will encourage the young pianist to expand his or her learning in the most enjoyable way. This is the full eBook edition in fixed-layout format.
