HTML, the Definitive Guide O'Reilly Media
From the author of the #1 New York Times bestseller Fire and Fury and Siege: Trump Under Fire—Michael Wolff's wickedly funny chronicle of his rags-to-riches-to-rags adventure as a fledgling Internet entrepreneur exposes an industry powered by hype, celebrity, and billions of investment dollars, and notably devoid of profit-making enterprises. As he describes his efforts to control his company's burn rate—the amount of money the company consumes in excess of its income—Wolff offers a no-holds-barred portrait of unaccountable successes and major disasters, including the story behind Wired magazine and its fanatical founder, Louis Rossetto; the rise of America Online, perhaps the most dysfunctional successful company in history; and the humiliating inability of people such as Bill Gates to untangle the intricacies of the Web.

Internet Handbook O'Reilly Media
This "bible" of PalmPilot covers Palm III, as well as OEM models, such as the IBM Workpad. Dense with undocumented information, it contains hundreds of timesaving tips. The CD-ROM contains 850 free and shareware programs for the Pilot in a searchable FileMaker-based runtime database.

PalmPilot University Press of America
This text is an indispensable compendium for Web content developers. It contains everything you need to create functional cross-platform Web applications.

Dynamic HTML O'Reilly Media
This Code of Practice provides a clear overview of EV charging equipment, as well as setting out the considerations needed prior to installation and the necessary physical and electrical installation requirements. It also details what needs to be considered when installing electric vehicle charging equipment in various different locations - such as domestic dwellings, on-street locations, and commercial and industrial premises. Key changes from the second edition include: Two completely new sections Vehicles as Energy Storage Integration with smart metering and control, automation and monitoring systems A new Annex A complete update to the new requirements in BS 7671:2018 Bringing the Code in line with revised regulations and good practice The risk assessments and checklists have also been reviewed and revised. This very well established Code of Practice, supported by all the major stakeholders in the industry, is essential reading for anyone involved in the rapid expansion of EV charging points, and those involved in maintenance, extension, modification and periodic verification of electrical installations that incorporate EV charging.

Great War Artefacts in 100 Objects Simon and Schuster
The First World War touched every community and almost every home in the UK. In its wake, it left behind memories and mementos of loved ones. For every casualty there was a scar, for every death there was grief. Often the only tangible connection with those who fought, whether they survived the horrors of that brutal conflict or remained in some foreign field, are the artifacts still held, so dearly, by their families. Some might still possess the death pennies, or memorial plaques, or fathers, uncles or grandfathers sent by a grateful government, or the terrible message that told of a brother missing believed killed . Not all the items held by families are sad reminders of the past. The Princess Mary Gift Fund box, sent to the men at the front for Christmas 1914, for example, contained such luxuries as chocolate and tobacco, and brought great pleasure to the men in the trenches. Items of uniforms, photographs, and, most poignant and personal of all, the letters written from the front, present the human side of an inhuman war, in a deeply moving snapshot of the past. The full-color photographs of each 100 items are accompanied by detailed explanations of the object and the people and events which make them so special not just to the families concerned, but to all those who hold such artifacts in cupboards, on mantelpieces or shelves, or in display cases. The memory of the men and women they represent lives on through the items they have left behind."

Code of Practice for Electric Vehicle Charging Equipment Installation
This volume is presented as a collection of primary research materials for scholars and artists. Each composer presents either a score or some form of documentation of one of his works and, in an accompanying essay, discusses his music in detail, exploring both its aesthetic and structural premises. The purpose of this book is not to present analyses or critical evaluations of this original and diverse body of works but rather, for the first time, to document the major activities of recent composers working in the important hybrid media of sound-text and sound-installation. It is hoped that this book will mark the beginning of a general recognition of the importance of such inter-media works as well as encourage future exploration of the aesthetic and structural innovations continued therein. Composers discussed include John Cage, Robert Ashley, Max Neuhaus, Alvin Lucier and Kenneth Gaburo.
