'A landmark in the process of decolonizing
imperial Western knowledge.' Walter Mignolo,
Duke University To the colonized, the term
'research' is conflated with European
colonialism; the ways in which academic
research has been implicated in the throes of
imperialism remains a painful memory. This
essential volume explores intersections of
imperialism and research - specifically, the
ways in which imperialism is embedded in
disciplines of knowledge and tradition as
'regimes of truth.' Concepts such as
'discovery' and 'claiming' are discussed and
an argument presented that the
decolonization of research methods will help
to reclaim control over indigenous ways of
knowing and being. Now in its eagerly awaited
second edition, this bestselling book has been
substantially revised, with new case-studies
and examples and important additions on new
indigenous literature, the role of research in
indigenous struggles for social justice, which
brings this essential volume urgently up-to-
date.

Musician, composer, producer: Brian
Eno is unique in contemporary music.
Best known in recent years for
producing U2's sensational albums,
Eno began his career as a synthesizer
player for Roxy Music. He has since
released many solo albums, both rock
and ambient, written music for film and
television soundtracks, and
collaborated with David Bowie, David
Byrne, Robert Fripp, and classical and
experimental composers. His
pioneering ambient sound has been
enormously influential, and without him
today's rock would have a decidedly
different sound. Drawing on Eno's own
words to examine his influences and

ideas, this book—featuring a new
afterword and an updated discography
and bibliography—will long remain
provocative and definitive.

An award-winning scientist offers his

unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

In this remarkable memoir, Anna Goldsworthy recalls her first steps towards a life in music, from childhood piano lessons with a local jazz muso to international success as a concert pianist. As she discovers passion and ambition, and confronts doubt and disappointment, she learns about much more than tone and technique. This is a story of the getting of wisdom, tender and bittersweet. With wit and affection, Goldsworthy captures the hopes and uncertainties of youth, the fear and exhilaration of performing, and the complex bonds between teacher and student. An unforgettable cast of characters joins her: her family; her friends and rivals; and her teacher, Mrs Sivan, who inspires and challenges her in equal measure, and who transforms what seems an impossible dream into something real and sustaining.
