Andy Goldsworthy is one of the leading British sculptors working with nature in the landscape.

This work on Andy Goldsworthy combines illustrations and specially commissioned essays by writers familiar with the artist and his work. Waterloo Haynes Manuals Written by a leading proponent of biophilic design, this is the only practical guide to biophilic design principles for interior designers. Describing the key benefits, principles and processes of biophilic design, Nature Inside illustrates the

implementation of biophilic design in interior design practice, across a range of international case studies – at different scales, and different typologies.

Starting with the principles of biophilic design, and the principles and processes in practice, the book then showcases a variety of interior spaces – residential, retail, workplace, hospitality, education, healthcare and manufacturing. The final chapter looks ‘outside the walls’, giving a case study

at the campus and city scale. With practical guidance and real-world solutions that can be directly-applied in day-to-day practice, this is a must-have for designers interested in applying biophilic principles.

Vinyl Freak Motorbooks International

If you ever needed proof that a magazine can have a love affair with a musician, you're holding it in your hands. For *DownBeat*, the

preeminent publication of the jazz world, Miles Dewey Davis was one of its most cherished subjects. Since it began covering the jazz scene in 1939, no other artist has been more diligently chronicled in its pages than Davis. The beauty of this collection is seeing the development of an artist over time. The reviews of his music go from quietly introducing a new talent to revering, perhaps, the greatest jazz artist of his generation. The feature articles begin with a very young, very polite Davis lamenting, "I've worked so little. I could probably tell you where I was playing any night in the last three years." As he develops, the interviews show Davis gaining confidence and stature, showing swagger and becoming the over-the-top, say-it-like-it-is showman that made every interview an event. The Miles Davis Reader compiles more than 200 news stories, feature articles, and reviews by some of the greatest writers in jazz into one volume. It delivers a patchwork of his words and music – in the moment, as they happened. With several lengthy features added along with a dozen new photographs, this new edition is a beautiful series of snapshots, a year-by-year ride through the many phases of Davis as an artist and as a man. **Driver's Manual** Haynes Manuals N. From scouring flea markets and eBay to maxing out their credit cards, record collectors will do just about anything to score a long-sought-after album. In Vinyl Freak, music writer, curator, and collector John Corbett burrows deep inside the record fiend's mind, documenting and reflecting on his decades-long love affair with vinyl. Discussing more than 200 rare and out-of-print LPs, Vinyl Freak is composed in part of Corbett's long-running DownBeat magazine column of the same name, which

was devoted to records that had not appeared on CD. In other essays where he combines memoir and criticism, Corbett considers the current vinyl boom, explains why vinyl is his preferred medium, profiles collector subcultures, and recounts his adventures assembling the Alton Abraham Sun Ra Archive, an event so all-consuming that he claims it cured his record-collecting addiction. Perfect for vinyl newbies and veteran crate diggers alike, Vinyl Freak plumbs the motivations that drive

Corbett and collectors everywhere.

The Innovations in
American Government
Awards Program began in

1985 with a grant from the Ford Foundation to the Kennedy School of Government at Harvard to conduct a program of awards for innovations in state and local government. The foundation's objective was ambitious and, in an era of "government is the problem" rhetoric, determinedly proactive. It sought to counter declining public confidence in government by highlighting innovative and effective programs. Over twenty years later, research, recognition, and replication are the

source of the program's continuing influence and its vitality. What is the future of government innovation? How can innovation enhance the quality of life for citizens and strengthen democratic governance? Innovations in Government: Research, Recognition, and Replication answers these questions by presenting a comprehensive approach to advancing the practice and study of innovation in government. The authors discuss new research on innovation, explore the impact of several programs that recognize

innovation, and consider challenges to the replication of innovations. Contributors include Eugene Bardach (University of California–Berkeley), Robert Behn (Harvard University), John D. Donahue (Harvard University), Marta Ferreira Santos Farah (Center for Public Administration and Government, Fundação Getulio Vargas), Archon Fung (Harvard University), Jean Hartley (University of Warwick), Steven Kelman (Harvard University), Gowher Rizvi (Ash Institute for Democratic Governance

and Innovation, Harvard University), Peter Spink (Center for Public Administration and Government, Fundação Getulio Vargas), and Jonathan Walters (Governing).
