Colombia, one of South Americas oldest, middle-income democracies, has developed rapidly despite a fifty year "simmering" civil war and increasing levels of

urban and rural crime and violence. In the past decade, however, the scale and intensity of violence has changed from a marginal conflict to generalized violence that now dominates the daily lives of most citizens. As remote guerilla activity has turned into country-wide "war," bringing in paramilitary groups, drug cartels, and other social actors, so too the causes of violence have changed. These have included both external events such as the collapse of the Cold War, as well as internal changes relating to economic liberalization, coal and oil developments and the impact of the global trade in illicit narcotics. Violence in Colombia is highly complex not only because of the different categories, but also due to its multiple causes. This paper combines disparate existing theories to develop an integrated framework that identifies four different levels of causality: structural, institutional, interpersonal, and individual. It recognizes the mutually reinforcing role played by factors at different levels of causality. Underlying the causes of violence in Colombia is minimal state presence in many parts of the country, widespread corruption and

impunity, high levels of societal acceptance of violence, and a regionally fragmented country.

Moral and political questions are vitally relevant to the issue of survival in the nuclear age. Ethics has much to teach us about the meaning of national defence and civic responsibility in the nuclear state. For instance, those in NATO who argue for increased spending on such weapons do so with the intention of defending the values of the West. They must therefore be absolutely sure that they are not – as the contributors to this volume, originally published in 1984, powerfully suggest – undermining or destroying those values by the very means they adopt to preserve them. With the continued success of nuclear deterrence itself in question, responsible citizens feel an urgent need to assess the clash between personal doubts, cherished principles and their governments' loudly voiced moral certainties. In *Objections to Nuclear Defence*, professional philosophers of widely varying persuasions provide new analyses of these problems. They spell out clearly and vividly the moral and political objections – objections to the concrete nuclear policies of the Western governments today. Often impassioned but always rational, the book will be of special interest to students of international affairs, peace studies and applied philosophy as well as to the general reader who is trying to choose between political parties in Europe or North America.

THE CLASSIC BOOK THAT HAS INSPIRED
MILLIONS A penetrating examination of how we
live and how to live better Few books transform a
generation and then establish themselves as
touchstones for the generations that follow. Zen
and the Art of Motorcycle Maintenance is one such
book. This modern epic of a man's search for
meaning became an instant bestseller on
publication in 1974, acclaimed as one of the most
exciting books in the history of American letters. It
continues to inspire millions. A narration of a
summer motorcycle trip undertaken by a father and
his son, Zen and the Art of Motorcycle
Maintenance becomes a personal and philosophical
odyssey into fundamental questions on how to live.
The narrator's relationship with his son leads to a

powerful self-reckoning; the craft of motorcycle maintenance leads to an austere beautiful process for reconciling science, religion, and humanism. Resonant with the confusions of existence, this classic is a touching and transcendent book of life. This new edition contains an interview with Pirsig and letters and documents detailing how this extraordinary book came to be.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even

provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

How was Wolfenstein 3D made and what were the secrets of its speed? How did id Software manage to turn a machine designed to display static images for word processing and spreadsheet applications into the best gaming platform in the world, capable of running games at seventy frames per seconds? If you have ever asked yourself these questions, *Game Engine Black Book* is for you. This is an engineering book. You will not find much prose in here (the author's English is broken anyway.)

Instead, this book has only bit of text and plenty of drawings attempting to describe in great detail the Wolfenstein 3D game engine and its hardware, the IBM PC with an Intel 386 CPU and a VGA graphic card. *Game Engine Black Book* details techniques such as raycasting, compiled scalers, deferred rendition, VGA Mode-Y, linear feedback shift register, fixed point arithmetic, pulse width modulation, runtime generated code, self-modifying code, and many others tricks. Open up to discover the architecture of the software which pioneered the First Person Shooter genre.
