This book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of China's rise. The purpose is to explain the formation and trajectory of its economic 'accumulation system' — which remains a confounding hybrid of statist and neoliberal forms of capitalism — as the outcome of China's geopolitical engagement of the USA during the late stages of the Cold War, and its participation in manufacturing global production networks (GPNs). Fear of geopolitical catastrophe drove China to open its economy, while GPNs enabled China to generate substantial export surpluses which could be recycled through state-owned banks as cheap credit and subsidies to large, vertically integrated and politically-controlled state-owned enterprises. In this way, a synergy emerged between the 'neoliberal' and 'Keynesian-Fordist' sectors of the economy, while the national-territorial state retained its form and expanded its functions. The book chronicles how this reliance on export surpluses, however, rendered China extremely vulnerable to external shocks — prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008, even while sustaining the illusion of economic 'decoupling' from the global economy. Finally, it examines the growing role of the state in the current crisis-ridden economic model, as well as China's current geoeconomic and geopolitical expansionism in areas such as the Belt and Road Initiative and the militarisation of the East and South China Seas.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal gift for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect gift for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

With the help of the Clymer Yamaha XJ550, XJ600 & FJ600 1981-1992 Repair Manual in your toolbox, you will be able to maintain, service and repair your motorcycle to extend its life for years to come. Clymer manuals are very well known for their thorough and comprehensive nature. This manual is loaded with step-by-step procedures along with detailed photography, exploded views, charts and diagrams to enhance the steps associated with a service or repair task. This Clymer manual is organized by subsystem, with procedures grouped together for specific topics, such as front suspension, brake system, engine and transmission It includes color wiring diagrams. The language used in this Clymer repair manual is targeted toward the novice mechanic, but is also very valuable for the experienced mechanic. The service manual by Clymer is an authoritative piece of DIY literature and should provide you the confidence you need to get the job done and save money too.

Quad Rotorcraft Control develops original control methods for the navigation and hovering flight of an autonomous mini-quad-rotor robotic helicopter. These methods use an imaging system and a combination of inertial and altitude sensors to localize and guide the movement of the unmanned aerial vehicle relative to its immediate environment. The history, classification and applications of UAVs are introduced, followed by a description of modelling techniques for quad-rotors and the experimental platform itself. A control strategy for the improvement of attitude stabilization in quad-rotors is then proposed and tested in real-time experiments. The strategy, based on the use low-cost components and with experimentally-established robustness, avoids drift in the UAV's angular position by the addition of an internal control loop to each electronic speed controller ensuring that, during hovering flight, all four motors turn at almost the same speed. The quad-rotor's Euler angles being very close to the origin, other sensors like GPS or image-sensing equipment can be incorporated to perform autonomous positioning or trajectory-tracking tasks. Two vision-based strategies, each designed to deal with a specific kind of mission, are introduced and separately tested. The first stabilizes the quad-rotor over a landing pad on the ground; it extracts the 3-dimensional position using homography estimation and derives translational velocity by optical flow calculation. The second combines colour-extraction and line-detection algorithms to control the quad-rotor's 3-dimensional position and achieves forward velocity regulation during a road-following task. In order to estimate the translational-dynamical characteristics of the quad-rotor (relative position and translational velocity) as they evolve within a building or other unstructured, GPS-deprived environment, imaging, inertial and altitude sensors are combined in a state observer. The text give the reader a current view of the problems encountered in UAV control, specifically those relating to quad-rotor flying machines and it will interest researchers and graduate students working in that field. The vision-based control strategies presented help the reader to a better understanding of how an imaging system can be used to obtain the information required for performance of the hovering and navigation tasks ubiquitous in rotored UAV operation.

122 pages and more than 250 illustrations and charts, size 8.25 x 10.75 inches. This workshop manual is a faithful reproduction of the original Yamaha factory 'Combined Workshop Manual' part number LIT-11612-14-99 for the DTI Series of motorcycles manufactured between 1968 and 1971. Based on our research, Yamaha published at least 7 service manuals and 3 supplements for the 1968-1971 DT1 series. However, the revised 'Combined' workshop manual LIT-11612-14-99 is considered to be the most comprehensive as it was published after the introduction of the 1971 models and it includes the MX series and GYT modifications for racing. It should be noted that the side by side landscape pages beginning with the 'DT1A (1968) Model Changes' section have been re-formatted into single pages for improved readability. In addition, the 'Motorcycle Service News' page that deals with the installation of the 'lighting choke coil' has been omitted as there were no legible versions published in any of the DT1 series of workshop manuals. However, the installation of the 'choke coil' is addressed in both the 'wiring diagrams' and the 'DT1A to DT1B Changes' sections of the 'combined' manual. We encourage you to exercise caution when purchasing technical publications for your classic Yamaha DT Series motorcycle as many of the reprints found on internet websites are from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality, comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned', 'used' or even 'refurbished'. In addition, they are often advertised for the incorrect series and/or model years. While original manuals can also be sourced through on-line sellers they are normally very expensive and we are pleased to be able to offer this reasonable priced alternative. VelocePress.com has been publishing reprints of motorcycle and automobile manuals since 2003 and our publications have earned excellent reviews worldwide so you can be assured you are purchasing a quality product.

This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like "Reliable Code Execution on a Tamagotchi," "ELFs are Dorky, Elves are Cool," "Burning a Phone," "Forget Not the Humble Timing Attack," and "A Sermon on Hacker Privilege." Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

Volume 3 of the PoC || GTFO collection--read as Proof of Concept or Get the Fuck Out--continues the series of wildly popular collections of this hacker journal. Contributions range from humorous poems to deeply technical essays bound in the form of a bible. The International Journal of Proof-of-Concept or Get The Fuck Out is a celebrated collection of short essays on computer security, reverse engineering and retrocomputing topics by many of the world's most famous hackers. This third volume contains all articles from releases 14 to 18 in the form of an actual, bound bible. Topics include how to dump the ROM from one of the most secure Sega Genesis games ever created; how to create a PDF that is also a Git repository; how to extract the Game Boy Advance BIOS ROM; how to sniff Bluetooth Low Energy communications with the BCC Micro:Bit; how to conceal ZIP Files in NES Cartridges; how to remotely exploit a TetriNET Server; and more. The journal exists to remind us of what a clever engineer can build from a box of parts and a bit of free time. Not to showcase what others have done, but to explain how they did it so that readers can do these and other clever things themselves.

The book is dedicated as an auxiliary literature for academic staff of universities, research institutes, as well as for students of transport teaching. The aim of the conference was to present the achievements of national and foreign research and scientific

centers dealing with the issues of rail, road, air and sea transport in technical and technological aspects, as well as organization and integration of the environment conducting research and education in the discipline of civil engineering and transport. International Scientific Conference Transport of the 21st Century was held in Ryn, Poland, in the 9th-12th of June 2019. The research areas of the conference were as follows: • transport infrastructure and communication engineering, • construction and operation of means of transport, • logistics engineering and transport technology, • organization and planning of transport, including public transport, • traffic control systems in transport, • transport telematics and intelligent transportation systems, • smart city and electromobility, • safety engineering and ecology in transport, • automation of means of transport. It also used by specialists from central and local government authorities in the area of deepening knowledge of modern technologies and solutions used for planning, managing and operating transport.

This Open Access book presents a good overview of the current research landscape of assembly, handling and industrial robotics. The objective of MHI Colloquium is the successful networking at both academic and management level. Thereby, the colloquium focuses an academic exchange at a high level in order to distribute the obtained research results, to determine synergy effects and trends, to connect the actors in person and in conclusion, to strengthen the research field as well as the MHI community. In addition, there is the possibility to become acatined with the organizing institute. Primary audience is formed by members of the scientific society for assembly, handling and industrial robotics (WGMHI).
