The Sibirsky (Siberian) Extreme Project was a 2009 motorcycle adventure project by motorcycle adventurer Walter Colebatch to attempt to go into the ultimate depths of Siberia. The project aimed to push the boundaries of what is known and what is possible in terms of motorcycling in Siberia and hoped to ride new routes and tracks that had yet to be explored by adventure motorcyclists to date. On the ambitious schedule were: - the Tuva Track, a vague boggy unriden route linking the Altai and Tuvan Republics, near the Mongolian border, between the towns of Kosh Agach and Mugur Aksy - the Anabar Road from Lensk to Udachny, an unriden route leading further north in Asia than anyone had ridden before (over 66 degrees North). - the Vilyuisky Trakt, an unriden dirt track only completed in early 2009 that runs 1500 kms east (950 miles) between Lensk, Mirny and Yakutsk. - the legendary BAM Road, 4300 km from Vanino on the Pacific Ocean to Taishet in central Siberia; an abandoned road no motorcyclist had ever even attempted in its entirety, let alone ridden. To many adventurers, the BAM Road is the toughest road on the planet. This book covers the planning, the riding, the struggles, the triumphs and the disappointments of this incredibly challenging itinerary.

Bernt Spiegel's The Upper Half of the

Motorcycle was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.

Roads are for journeys, not destinations. In 2003 Melbourne couple Shirley Hardy-Rix and her husband Brian Rix fulfilled a lifelong ambition of motorcycling across the world. In an incredible 350-day journey, they would do everything they'd ever dreamed of as well as getting much more than they'd bargained for. Crossing 27 countries and covering 56,671 kilometres, they raced around the Isle of Man motorcycle circuit on Mad Sunday, survived Iran's traffic and travelled through Taliban strongholds under armed guard. Shirley and Brian's story is an epic account of the ups and downs of seeing the world on two wheels - from the frustrations of potholes and flat tyres, to the splendour of some of Europe and Asia's most awe-inspiring sights. Full of terrific anecdotes, down-to-earth humour and practical advice, *Two for the Road* is a must for anyone who's ever imagined escaping the daily grind to experience the romance of the open road.

Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.

On the occasion of the 90th anniversary of Pininfarina, a marque synonymous with style and elegance applied to car design, Pininfarina is a book that surveys, for the first time, the entire output of the Turin coachbuilder, model by model. Produced in close collaboration with the company, it draws on invaluable photographic material accompanying brief contextualising texts. Tracing the history of Pininfarina from its origins to the present day entails reviewing some of the most iconic models in automotive history: from the numerous Ferraris bodied by the historic partner of the Maranello firm to cars such as the Cisitalia 202, the Lancia Aurelia, the Alfa Romeo Duetto and 164, the Maserati

GranTurismo through to the current models born under the aegis of the Indian firm Mahindra. The book also covers the numerous Pininfarina concept cars that have written glorious pages in the history of design, raising the bar every time in terms of the excellence of the car product.

Sahara Overland

Chris Scott and his band of globetrotting contributors and specialists have put together the definitive manual for planning and undertaking a vehicle-dependent overlanding adventure across the wilds of Africa, Asia and Latin America. The Overlanders' Handbook is written in the same entertaining yet clear jargon-free English for which Chris's other books are known – it doesn't assume you know your plug gap from a radiator cap. Planning – When to go; typical costs; documentation; sponsorship; early overland journeys. Vehicle choice and preparation – The Overlanders' Handbook is the most comprehensive account in print, covering everything from adapting a cheap car to equipping a campervan or 4x4 for months on the road, or even building and outfitting your own accommodation module to mount on an all-terrain truck chassis. Life on the road – How to handle dodgy borders, haggle over a purchase, treat a dodgy stomach and cope with crazy driving conditions. Guidance on wild camping; navigation and mapping strategies; onward shipping; advice for solo women overlanders; travelling with children or with pets; vehicle repairs and troubleshooting; and off-road driving techniques. Continental route outlines – Guidelines on both popular and obscure overland routes through Africa, Asia and Latin America. Includes fuel prices, easiest borders and best seasons, visa strategies, danger zones and regional highlights. Overlanders' Tales – Half a dozen accounts of global adventures lasting months or even years – in vans, 4x4s and all-terrain trucks – from contributors aged from 9 to 69.
