Paul, Mark and
Nancy have
finished school
and are facing a
British summer

of uncertainty
while they
consider how to
move on... three
'average'
teenagers who
learn the
meaning of
growing up and
letting go. 'Snail
Racing' tells the

story of three friends attempting to take control of their futures, dealing with the subtle and complex issues of gender, belonging, connection, and alienation - a short story that is both poignant and told with an underlying wry wit... and, yes, they do race snails. College student Mac, lonely though surrounded by friends, is obsessed with his guitar - the only thing he can really relate to and express

himself through. 'Guitar Hero' picks up on the themes of 'Snail Racing' and ups the ante in a world of free sex, cheap drink and expensive amplifiers - the second short story presented in this retrospective is delineated with a gentle humanity and reminds those who may have forgotten that the folly of youth is often a brave front. In a future world of virtual warfare, those with the fastest synaptic responses become heroes.

In 'Homunculus', we meet Gurt, a 'Top Tester' for a bio-tech conglomerate that develops new kinds of weapons - but he is being changed by his experiences just as any real soldier is. Has he been contaminated? Is he losing part of himself or discovering himself anew? What secret is Gabby hinting at? Something strange is happening... and soldiers must have their orders. Mixing elements from

SF, zombie horror and romance, the third short story in this collection remains highly relevant in a time when we are gradually losing-and-finding ourselves in the digital world... 'The Race Glass' is a retrospective, novelette-length, collection of short stories from the author of 'Scraps' and is presented here with an insightful introduction by Remy Dean.

Kawasaki KLR650 2008-2017 David Bull Publishing

How do you replace a legend? For Ducati, the Italian motorcycle manufacturer worshiped by racers and riders all over the world, the answer was to start from scratch. When the company decided to produce a successor to its immensely popular 916/996/998 series, it allowed designer Pierre Terblanche to create a completely new bike built from the inside out. This

approach resulted in a radically styled motorcycle whose improved ergonomics offer greater comfort and control, with more agile handling at all speeds. Ducati also broke with tradition by allowing two of the worlds top motorcycling writers, Alan Cathcart and Marc Cook, to document the birth of the 999-from the earliest design ideas through final production. In an industry where product plans and manufacturing techniques are usually guarded like state secrets, Cathcart and Cook were given complete access to the designers, engineers, and technicians who worked to make the 999 a superbike sensation.

Despite being one of the most successful motorcycles of all time, the Royal Enfield Bullet has had a very chequered history. Its story begins in the 1930s and by the 1950s it was at the height of its popularity in post-War Britain. Then it became a stalwart of the Indian Army and manufacture transitioned from Britain to India. The near-collapse of the Royal Enfield marque in the 1990s almost meant the end of this classic motorbike, but with the involvement of the Eicher Group from 2001 onwards,

the updated Bullet generated new interest and renewed its original commercial success, just like a phoenix rising from the ashes. With over 200 photographs, this book describes the origins of the Royal Enfield company and the pre-war Bullets from 1932 and the relaunch of the Bullet in 1949 with its radical swinging-arm frame. Derivative models such as the 350 and 500, as well as those for competition and road are covered as well as specials such as diesels, V-twins, Egli and big-bore Bullets. The development story behind the lean-burn, electric-start and 5-speed updates is discussed as well as the UCE - the all-new Bullet from 2008 and the Classic and its

design story. Finally, the evolution beyond the Bullet is covered which includes the Continental GT and Himalyan 650 twins.

Acceleration and Passing Ability

David Bull
Publishing

The suspension expert's illustrated, comprehensive troubleshooting guide for dirt, street, and supermoto—with a solution to virtually any problem.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension

tuning accessible to professional and backyard motorcycle mechanics alike.

Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding.

And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance.

America, Incorporated Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where

every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and

mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
