Achieving Sustainable Development explores how well Canada has met the Earth Summit's targets and attempts to find ways in which the public can become involved in such issues. Its authors stress the importance of integration of information from various fields and seek to stimulate the exchange of knowledge among the academic community, government, non-governmental organizations and industry. The contributors look far beyond merely identifying and analyzing selected issues and problems. To facilitate public discussion and to affect policy development, at least one initiative is proposed and detailed for each problem identified.

Involved in rabies research for much of their working careers, editors Rowland Tinline and David Gregory explore Canada ' s unique contributions to rabies management in Taking the Bite out of Rabies. By placing the major players in rabies management from provincial and federal agencies, universities, and research institutions in historical context, Tinline and Gregory trace Canada ' s largely successful efforts to control rabies. Concerned about the loss of institutional memory that tends to follow success, Tinline and Gregory view this book as a crucial way to collate, verify, and preserve records for future understanding and research. The book maps the history of rabies across Canada and explores the science, organization, research, and development behind Canada ' s public health and wildlife vaccination programs. It also discusses how ongoing changes in agency mandates, the environment, and the evolution of the rabies virus affect present and future prevention and control efforts.

The standard style guide of the Christian publishing industry, The Christian Writer ' s Manual of Style, 4th Edition, compiled by veteran Zondervan editor Robert Hudson, contains clear guidance on style questions related to religious writing, including many topics not addressed in other references or online. Nearly half of this fourth revision is made up of new material, including information about turning blogs into books, the effects of digital media on writing, " adverbial doubles, " " vanishing accents, " word-choice strategies, endorser guidelines, and much more. It also contains an all-new " Word List " which makes up more than a third of the book. The most needful information remains—entries on capitalization, abbreviation, citations, fictional dialogue, and more—but it has all been updated to keep pace with changes in English language usage. This fourth edition also corresponds with The Chicago Manual of Style, 16th Edition (2010), though it isn ' t afraid to chart new territory where that reference is unhelpful on issues of religious writing.

Comprehensive yet easy-to-use, The Christian Writer ' s Manual of Style, 4th Edition, is a go-to resource for Christian authors, pastors, teachers, copy writers, editors, proofreaders, publishing and ministry professionals, executive assistants, and students—anyone who writes or edits as a part of their work or study—and for grammar aficionados everywhere.

Co-management boards, established under comprehensive land claims agreements, have become key players in land-use planning, wildlife management, and environmental regulation across Canada ' s North. This book provides a detailed account of the operation and effectiveness of these boards while addressing a central question: Have they been successful in ensuring substantial Indigenous involvement in policies affecting the land and wildlife in their traditional territories? While identifying constraints on the role Northern Indigenous peoples play in board processes, Graham White finds that overall they exercise extensive decision-making influence. These findings are provocative and offer valuable insights into our understanding of the importance of land claims boards and the role they play in the evolution of treaty federalism in Canada.
