Multi-valve rationale Multi-valve engine design. A multi-valve engine design typically has three, four, or five valves per cylinder to achieve improved performance. Any four-stroke internal combustion engine needs at least two valves per cylinder: one for intake of air (and often fuel), and another for exhaust of combustion gases. Adding more valves increases valve area and improves the flow ...

2005 Opel Zafira 1.9 CDTI: The Opel Zafira 1.9 CDTI is a multi-purpose vehicle with 5 doors and a front mounted engine which transmits its power through the front wheels. The power is produced by a turbocharged engine of 1.9 litre capacity. This unit features single overhead camshaft valve gear, 4 cylinder layout, and 2 valves per cylinder. It produces 118 bhp (120 PS/88 kW) of power at 3500 ...

I assume that both the Saab and Vauxhall 1.9 diesel engines are the same (engine code Z19DT 8v 120bhp). What I would like to know is will the Vauxhall engine be a direct fit to my 9-3 or are any mods required.

[Vauxhall Z19dt Engine - reacthealthy.com](#)

The Z19DTJ was fitted into cars around 2005. Mainly Astra elites had this engine but a few sri's also had this engine. and the astra design as well, you could get either engine. the 1.9 came out for the 2005 model year and the 8v came out early 2006

Evening, I know there are loads of threads about flywheels, but I can't find a reliable answer to this one. I have a 2008 Vectra Est SRi 120 8v. It needs a new flywheel/ Can anyone say whether the flywheel for the 16v 150 will fit the Z19DT engine? I can't see why it would be any different as the Z19DTH differences are all in the top end.

[Z19DT Flywheel - Signum](#)

The engine block weighs approximately 125 kg (276 lb), the cylinder head features an overhead camshaft with directly actuated valves. The best part about this engine was it was designed by the engineers of Ferrari, so performance is par with other car in the segment.

If so could i put one on my Z19DT Vectra C? Also what about the inter-cooler? Any difference in them at all? I thought that the only difference between the 8v and 16v Vectras was the head and the rest relatively the same. I know the turbo placement is different on the two engines, but that's about it. any help would be much appreciated.
