BMW, that most
performance-oriented of car
companies, had no
affordable sports roadster in
its line-up before 1995.
Stung into action by
Mazda's revival of the
classic two-seater roadster,
the Germany company
quickly staked its claim with
the Z3, a classic long-nose,
short-tail design that used
existing BMW mechanical
hardware to good effect.
This new book tells the story
of BMW's Z3 and Z4 two-

seater roadsters and coupes, which since 1995 have been at the forefront of the affordable sports car market. The history of the Z3 and both generations of Z4 are covered as well as full specifications of all models; the formidable M Power derivatives and a guide to buying and owning. The book is profusely illustrated with over 200 colour photographs and diagrams. Contents include: Historical background to BMW's arrival in the two-seater sports car market; Complete history of the Z3 and both generations of Z4; Full specifications of all models; The formidable M Power derivatives; Guide to buying and owning.

For over 25 years Rob

Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

BMW Z4: Design,

Development and Production is the story of the creation of the Z4 from the first concept in the summer of 1998 until the delivery of customer cars in October 2002. David Lightfoot had exclusive access to the designers, engineers, and production personnel involved in the Z4, and provides an exciting behind-the-scenes look into the process. Never before has the story been told of how BMW brings together creative people and world renowned technical resources to deliver dream machines to its devoted clientele. David Lightfoot is a BMW enthusiast of the first order. He writes for Roundel, the publication of the BMW Car Club of America, on topics

ranging from BMW history to future products and development. A particular interest is high performance driving; he has been an instructor with his local BMW Club for more than 20 years. The irony of his driving style and his last name have been brought to his attention many times. He is a lifelong resident of Seattle, Washington. This is his first book.

To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it's different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we

once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for the cars of their youth, regret that they ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In *Resurrecting Bertha*, Rob Siegel assures you that this is normal (well, as normal as anything is with car people), and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that's enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 "Bertha," selling the car to a dear friend, its 26 years of

storage, and buying it back in a weak whisky-soaked moment only to experience the "oh dear God what did I just do" regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected.

Resurrecting Bertha is about more than just the nuts and bolts; it's about deciding what's important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.
