For many years, there has been a great deal of work done on chronic congestive heart failure while acute heart failure has been considered a difficult to handle and hopeless syndrome. However, in recent years acute heart failure has become a growing area of study and this is the first book to cover extensively the diagnosis and management of this complex condition. The book reflects the considerable amounts of new data reported and many new concepts which have been proposed in the last 3-4 years looking at the epidemiology, diagnostic and treatment of acute heart failure.

Food packaging materials have traditionally been chosen to avoid unwanted interactions with the food. During the past two decades a wide variety of packaging materials have been devised or developed to interact with the food. These packaging materials, which are designed to perform some desired role other than to provide an inert barrier to outside influences, are termed 'active packaging'. The benefits of active packaging are based on both chemical and physical effects. Active packaging concepts have often been presented to the food industry with few supporting results of background research. This manner of introduction has led to substantial uncertainty by potential users because claims have sometimes been based on extrapolation from what little proven information is available. The forms of active packaging have been chosen to respond to various food properties which are often unrelated to one another. For instance many packaging requirements for post harvest horticultural produce are quite different from those for most processed foods. The object of this book is to introduce and consolidate information upon which active packaging concepts are based. Scientists, technologists, students and regulators will find here the basis of those active packaging materials, which are either commercial or proposed. The book should assist the inquirer to understand how other concepts might be applied or where they should be rejected.

Zohra Segal ’ s no-holds-barred memoir is feisty, irreverent and candid — a ringside view of nearly a hundred years of her life on stage and screen, in India and England. In 1930 Zohra Segal struck out and went to Germany to study modern dance at Mary Wigman ’ s Dance School in Dresden. It was a most unusual decision — and a most unusual choice of career for an aristocratic young Indian woman. But then, Zohra was nothing if not unusual. In 1933 she returned to India, and in 1935 joined Uday

Shankar ’ s famed dance academy in Almora, together with Simkie and fellow dancer, Kameshwar, whom she married in 1942. On to Lahore and the Zoresh Dance Institute — and then her big move into acting: Prithvi Theatres, the Old Vic, the British Drama League, BBC television, The Jewel in the Crown, Toba Tek Singh, Bhaji on the Beach... Along the way she recounts her encounters with the greats of British theatre in the 1960s and ’ 70s — Sir Laurence Olivier, Sir Tyrone Guthrie, Fiona Walker, Priscilla Morgan and James Kerry among others — as well as her early forays into British television with Waris Hosain. In this unputdownable memoir, Zohra Segal recreates her life as one of India ’ s greatest and best-loved stage and screen actresses with the same verve and spirit that she brings to all her performances. As she says, “ Whatever I do, is for an audience! ” Zohra Segal: Among the many honours and awards that have been conferred on Zohra Segal are the Sangeet Natak Akademi Award (1963); the Norman Beaton Award for “ significant contribution to the development of multicultural film and television drama in the United Kingdom ” (1996); the Padma Shri (1998); the Sangeet Natak Akademi Fellowship for Lifetime Achievement (2004); and the Padma Vibhushan (2010).

The Nobel Prize-winning author delivers a Dickensian novel that traces the unlikely career of a failed schoolteacher and village masseur who becomes a revered mystic, a thriving entrepreneur, and the most beloved politician in Trinidad. “ No one else ... seems able to employ prose fiction so deeply as the very voice of exile. ” —The New York Review of Books In this slyly funny and lavishly inventive novel—his first—V. S. Naipaul chronicles the ascent of the impecunious village masseur Ganesh Ramsumair. To understand a little better, one has to realize that in the 1940s masseurs were the island ’ s medical practitioners of choice. As one character observes, “ I know the sort of doctors they have in Trinidad. They think nothing of killing two, three people before breakfast. ” Ganesh ’ s journey is variously aided and impeded by a Dickensian cast of rogues and eccentrics. There ’ s his skeptical wife, Leela, whose schooling has made her excessively, fond. of; punctuation: marks!; and Leela ’ s father, Ramlogan, a man of startling mood changes and an ever-ready cutlass. There ’ s the aunt known as The Great Belcher. There are patients pursued by malign clouds or afflicted with an amorous fascination with bicycles. Witty, tender, filled with the sights, sounds, and smells of Trinidad ’ s dusty Indian villages, The Mystic Masseur is Naipaul at his most expansive and evocative.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men ’ s struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African ‘ tradition ’ that has become a clich é in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men ’ s vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Regenerative medicine — stem cell and gene-based therapy — offers a new approach for restoring function of damaged organs and tissues. This is the first book to cover the major new aspects and field of regenerative medicine. This title is therefore a timely addition to the literature. It brings together the major approaches to regenerative medicine in one text, which ensures that techniques learnt in one discipline are disseminated across other areas of medicine.

If there ' s anyone who ' s been around, seen it all and lived life to the hilt, it has to be Khushwant Singh. India ' s most popular and prolific writer has, over the years, enlightened and outraged in equal measure, and enriched our lives with his humour, his honesty and his sharp insights and observations. In Khushwantnama, the 98-year-old reflects on a life lived fully and the lessons it has taught him. Here is his distilled wisdom on subjects as diverse as old age and the fear of death; on the joy of sex, the pleasures of poetry and the importance of laughter; on how to cope with retirement and live a long, happy and healthy life. Here, too, are his reflections on politics, politicians and the future of India; on what it takes to be a writer; and on what religion means to him.

More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence.
