This book provides an idea of nature of questions that has been asked in the previous year's exams. Recommended by Faculties and Read by UPSC Toppers.

New Media Influence on Social and Political Change in Africa IGI Global

This volume presents timely commentaries on issues relating to Africa and Latin America, demonstrating the value of intercultural dialogue amongst voices from the Global South on decoloniality, cultural rights and politics.

Methodological Innovations in Research

and Academic Writing Routledge
Concern for achieving Millennium Development Goals (MDGs) by 2015 has led to a focus on the role that non-state providers (NSPs) can offer in extending access and improving quality of basic services. While NSPs can help to fill a gap in provision to those excluded from state provision, recent growth in both for-profit and not-for-profit providers in developing countries has sometimes resulted in fragmentation of service delivery. To address this, attention is increasingly given in the education sector to developing 'partnerships' between governments and NSPs. Partnerships are further driven by the expectation that the state has the moral, social, and legal responsibility for overall education service delivery and so should play a role in facilitating and regulating NSPs. Even where the ultimate aim of both non-state providers and the state is to provide education of acceptable quality to all children, this book provides evidence from diverse contexts across Africa, South Asia, and Latin America to highlight the challenges in them partnering to achieve this. This book was published as a special issue of *Development in Practice*.

What Went Right, What Went Wrong and Wither To? a Treatise of the Country 'S Socio-Economic and Political Developments Since Independence Prabhat Prakashan

• This book comprises nine chapters drawn from the papers presented at the fourth annual conference of the African Accounting and Finance Association which took place in Somerset West, South Africa in 2014. The chapters address a number of aspects of accounting, ranging from the adoption of IFRS for SMEs in Africa, the compliance by SMEs with IFRS for SMEs in Ghana, the provision of finance to small businesses,

drivers of corporate failures, financial regulations, the audit of casinos, the auditors? report and investment decisions, the role of government audit committees, and audit fees and audit quality.

Dead Aid Springer Science & Business Media

This book explores the often controversial international large-scale assessments (ILSAs) in education and offers research-based accounts of international testing as a social practice. Assessment exercises, such as the Organisation for Economic Co-operation and Development's Programme for International Student Assessment (PISA), produce comparable international statistics and rankings on educational performance, and are influential practices that shape educational policy on a global scale. The chapters in this volume, written by expert researchers in the field, take the reader behind the scenes to document a broad range of ILSA practices – from the recruitment of countries into ILSAs, to the production and performance of large-scale testing, and the management, media reception and use of test data. Based on data that is only available to expert researchers with inside access, the international case study material includes examples from Australia, Ecuador, Germany, Japan, Mexico, Norway, Russia, Scotland, Slovenia, Sweden, the UK and the USA. The volume provides important insights for teachers, researchers and policy-makers who use and study assessment data and who wish to evaluate its significance for educational policy and practice.

The Global Student Experience Elsevier

his peer-reviewed journal publishes original research results in the field of environmental and ecological science with focus on applications to the sustainable management of natural, human-dominated, and man-made ecosystems. The aim of the journal is to provide a place for a rapid exchange of new ideas and concepts for scientists and engineers in the fields of environmental accounting, human and systems ecology, and environmental management. Manuscripts on environmental accounting and managements are solicited, including: mathematical modeling; computational and management techniques in environmental, ecological, energy and information science; environmental technology and engineering; human managed ecosystems such as agricultural, urban, coastal, riparian, and wetland ecosystems. No length limitations for contributions are set, but only concisely written manuscripts are considered for publication. Brief papers can be published on the basis of Technical Notes. Discussions of previous published papers are welcome. Topics of Interest Environmental and ecological economics, environmental accounting, environmental impact assessment, ecosystem service assessment, energy and resource use, social factors and management. Modeling in environmental conservation and restoration, eco-hydrology and water resources management, ecological process and pattern, climate change effects, environmental engineering and technology. Planning and management in human dimension-institutions and patterns for socio-economic systems, industrial ecology, ecological

informatics, landscape design, and urban planning. Environmental policy, legislation, and innovations with environmental and strategic impact assessment, project appraisal and auditing, and environmental protection. How Demographics Drive Media Coverage Cambridge University Press Describes the state of postwar development policy in Africa that has channeled billions of dollars in aid but failed to either reduce poverty or increase growth, offering a hopeful vision of how to address the problem. The Palgrave Handbook of Africa ' s Economic Sectors World Bank Publications Volume 1 (A and B) of the Yearbook of International Organizations covers international organizations throughout the world, comprising their aims, activities and events Perspectives on an emerging variety John Wiley & Sons In this volume, African scholars engaged in research on the continent reflect on their recent and ongoing empirical studies. They discuss the strengths and limitations of research methods, theories, and interventions designed outside Africa to spur innovative research on the continent. And they explore how insights from African philosophical, theoretical, and empirical work can be combined with exogenous forms of knowledge to generate understanding of the processes of African children ' s development in ways that are responsive to local contexts and meaningful for indigenous stakeholders. A new field of African child development research is

emerging in African societies, focusing on children as valued and vulnerable members of society and potential civic leaders of the future. Systematic inquiries are now designed to enhance our understanding of how African children think, to discover effective ways of communicating with them, and to inform successful strategies of promoting their health, education, and preparation for adult responsibilities in society. This is the 146th volume in this Jossey-Bass series *New Directions for Child and Adolescent Development*. Its mission is to provide scientific and scholarly presentations on cutting edge issues and concepts in this subject area. Each volume focuses on a specific new direction or research topic and is edited by experts from that field.

Fluency is the quintessence of effective reading. To obtain socio-economic success, fluent reading is of primordial importance and reading is considered a crucial marker of an individual's life course. Approximately 5% of children are affected by developmental dyslexia, exhibiting inaccurate word recognition, spelling, phonological decoding, and most importantly, severely dysfluent reading, which remains as their most characterizing and persistent deficit. Unable to attain society's literacy demands, individuals with dyslexia are at

severe risk for adverse academic, economic, and psychosocial consequences. Recently, it has been posed that the development of automatic letter-speech sound (LSS) integration is critical in the acquisition of fluent reading skills, and in particular that a failure to develop automatic LSS integration results in an impairment of reading fluency. In support, neurocognitive research has suggested that the development of automatized processing of LSS associations is an essential step in the formation of a functional neural network for reading. Furthermore, both neurocognitive and behavioural studies have suggested a less efficient LSS integration in children with dyslexia than in typical readers. Finally, results from intervention studies have suggested that training LSS might be a promising approach to ameliorate dysfluent reading in children with dyslexia. Nonetheless, there is still a considerable gap of knowledge in our understanding of the mechanisms by which learning LSS associations relate to (dys)fluent reading.

NDA/NA National Defence Academy & Naval Academy Solved Papers (2021-2015 English) Make yourself exam ready with the edition of Solved Papers of NDA/NA Entrance Examination aims to provide NDA solved papers from 2022 -2015. It is divided into 2 Papers including Paper 1- Mathematics Paper 2- General Ability papers. This book provides real knowledge of pattern,

toughness level and trend of exam to NDA/NA aspirants. This book NDA/NA provides previous years solved papers complete study material for the entrance. The book is gives real knowledge of exam pattern, level of toughness and trends of questions This book provides Complete Solution of: 1. GAT & Mathematics (Paper-1) 2021 2. GAT & Mathematics 2020 3. GAT & Mathematics (Paper 1 & 2) 2019 4. GAT & Mathematics (Paper 1 & 2) 2018 5. GAT & Mathematics (Paper 1 & 2) 2017 6. GAT & Mathematics (Paper 1 & 2) 2016 7. GAT & Mathematics (Paper 1 & 2) 2015

Texts in Six African Languages and in English Routledge

With one more year before the 2015 deadline for achieving the Millennium Development Goals, the 2014 Global Hunger Index report offers a multifaceted overview of global hunger that brings new insights to the global debate on where to focus efforts in the fight against hunger and malnutrition. The state of hunger in developing countries as a group has improved since 1990, falling by 39 percent, according to the 2014 GHI. Despite progress made, the level of hunger in the world is still serious, with 805 million people continuing to go hungry, according to estimates by the Food and Agriculture Organization of the United Nations. The global average obscures dramatic differences across regions and countries. Regionally, the highest GHI scores and therefore the highest hunger levels are in Africa south of the Sahara and South Asia, which have also experienced the greatest absolute

improvements since 2005. South Asia saw the steepest absolute decline in GHI scores since 1990. Progress in addressing child underweight was the main factor behind the improved GHI score for the region since 1990.

A brave account of the social and political forces that threaten a woman's right to choose, this emotionally affecting memoir from a doctor on the front lines of the abortion debate reveals what's really at stake in the Supreme Court In America the reproductive justice debate is reaching a new pitch, with the Supreme Court weighted against women's choice and state legislatures passing bills to essentially outlaw the practice of abortion. With *This Common Secret*, Dr. Susan Wicklund chronicles her twenty-year career in the vanguard of the abortion war. Growing up in working-class rural Wisconsin, Susan made the painful decision to have an abortion at a young age. It was not until she became a doctor that she realized how many women shared her ordeal of an unwanted pregnancy...and how hidden this common experience remains. Now, in this raw and riveting true story, Susan and the patients she's treated share the complex, anguished, and empowering emotions that drove their own choices. Hers is a calling that means sleeping on planes and commuting between clinics in different states--and that requires her to wear a bulletproof vest and to carry a .38 caliber revolver. *This Common Secret* reveals the truth about the reproductive health clinics that anti-abortion activists mischaracterize as damaging and unsafe. This intimate memoir explains how social stigma and restrictive legislation can isolate women who are facing difficult personal choices--and how we as a nation can, and must, support them.

Achieving Education for All through Public – Private Partnerships? SAGE

This book is the first collection of original research to explore links between demographics and media coverage of emerging human rights issues. It covers cross-national reporting on human trafficking, HIV/AIDS, water contamination, and child labour; and same-sex marriage, Guantanamo detainee rights, immigration reform, and post-traumatic stress disorder in the United States. The research asks questions such as: What are the principal catalysts that propel rights issues into media agendas? Why do some surface more quickly than others? And how do the demographics of cross-national reporting differ from those driving multi-city US nationwide coverage of rights claims? Using community structure theory and innovative Media Vector content analysis, the eight chapters of this book reveal three striking patterns that show how differences in female empowerment, social or economic vulnerability, and Midwestern newspaper geographic location, link powerfully with variations in coverage of rights issues. The patterns connecting demographics and rights claims confirm that coverage of human rights can mirror the concerns of stakeholders and vulnerable groups, contrary to conventional assumptions that media typically serve as "guard dogs" reinforcing the interests of political and economic elites. This

book was originally published as a special issue of The Atlantic Journal of Communication.

The Management of Resources as a Driver of Sustainable Development
Routledge

Originally published in 1978, this volume is divided into 3 parts. Part 1 presents an overview of the linguistic situation in Zambia: who speaks which languages, where they are spoken, what these languages are like. Special emphasis is given to the extensive survey of the languages of the Kafue basin, where extensive changes and relocations have taken place. Part 2 is on language use: patterns of competence and of extension for certain languages in urban settings, configurations of comprehension across language boundaries, how selected groups of multilinguals employ each of their languages and for what purposes, what languages are used in radio and television broadcasting and how decisions to use or not use a language are made. Part 3 involves language and formal education: what languages, Zambian and foreign, are used at various levels in the schools, which are taught, with what curricula, methods, how teachers are trained, how issues such as adult literacy are approached and with what success.

Cumulative listing Routledge

There are 100 million students in higher education throughout the world today. This collection provides some indication of what are they are learning and of their wider experiences. It also outlines the changing global context of provision for undergraduate students as countries and universities respond to what they anticipate will be new demands f
