The Historic U.S. Documents Cursive Handwriting Series will introduce students to the text of some of the most important documents in United States history. Teachers and parents can introduce historic documents in conjunction with the cursive handwriting workbooks during social studies and history lessons. Before using the Cursive Handwriting Copybook: U.S. Historic Documents, students should be able to understand the difference between capital and

lowercase cursive letters. To use this workbook successfully students should have already learned to write individual upper and lowercase cursive letters and be ready to move on to copying cursive text without tracing. Practicing cursive handwriting on a daily basis will expand a student's understanding for the concepts of written language. When cursive handwriting is practiced daily, spacing between words becomes more consistent. Teachers and parents can use the Cursive Handwriting Copybook: Historic U.S. Documents to utilize hand-over-hand guidance techniques that will help students make correct cursive letter strokes. Guided lines have been provided in this handwriting copybook to quickly teach correct cursive letter formation and word spacing. Cursive handwriting practice doesn't have to take place on paper only. Everyday objects can be used to help students create cursive letters. Students should be encouraged to write cursive letters in the air, sand, clay, shaving cream, etc. to make learning cursive fun. There are no cursive tracing letters in this workbook. It is

for Level 2 writers who can recognize upper and lowercase cursive letters and are beginning to write in cursive on their own without tracing. Why is this cursive handwriting workbook an important addition to your student's curriculum? A 2013 New York Times article states that, "Learning to write in cursive is shown to improve brain development in the areas of thinking, language and working memory. Cursive handwriting stimulates brain synapses and synchronicity between the left and right hemispheres, something absent from printing and typing. As a result, the physical act of writing in cursive leads to increased comprehension and participation. The College Board found that students who wrote in cursive for the essay portion of the SAT scored slightly higher than those who printed." This handwriting book is perfect for improving cursive penmanship. The Cursive Handwriting Copybook is a great resource for the homeschool classroom as well as public and private kindergarten, 1st grade, and 2nd grade classrooms. It's a great companion to printed alphabet handwriting programs such as Zaner-Bloser and Kumon. It's superior to one-page online cursive penmanship worksheets because it gives students a chance to get used to using the workbook format-the same type used in classrooms.

In their first edition of Mentor Texts, authors Lynne Dorfman and Rose Cappelli helped teachers across the country make the most of high-quality children's literature in their writing instruction. In Mentor Texts: Teaching Writing Through Children's Literature, K-6, 2nd Edition the authors continue to show teachers how to help students become confident, accomplished writers by using literature as their foundation. The second edition includes brand-new "Your Turn Lessons," built around the gradual release of responsibility model, offering suggestions for demonstrations and shared or guided writing. Reflection is emphasized as a necessary component to understanding why mentor authors chose certain strategies, literary devices, sentence structures, and words. Dorfman and Cappelli offer new children's book titles in each chapter and in a carefully curated and annotated Treasure Chest. At the end of each chapter a "Think About It--Talk About It--Write About It" section invites reflection and conversation with colleagues. The book is organized around the characteristics of good writing--focus, content, organization, style, and conventions. The authors write in a friendly and conversational style, employing numerous anecdotes to help teachers visualize the process, and offer strategies that can be immediately implemented in the classroom. This practical resource demonstrates the power of learning to read like writers.

Handwriting "Handwriting is proven to develop fine motor skills and eye-hand connection, strengthening the ability to translate ideas into words. In fact, it equips students to write and read more efficiently than reading and instruction alone. So when

it comes time to assess students' yearly progress, it's not just about reading (or math, or science). It's about preparing confident communicators equipped with cross-disciplinary skills that translate directly to demonstrating proficiency on standardized tests. Zaner-Bloser Handwriting has been carefully designed to support the Texas Essential Knowledge and Skills (TEKS) standards for handwriting. References to the TEKS appear throughout the Student and Teacher Editions." --Page v. Zaner-Bloser Handwriting Zaner-Bloser Handwriting Basic Skills and Application (series) Handwriting

"Tumultuous, vibrant, tragic and over too soon." --Newsday Handwriting is Michael Ondaatje's first new book of poetry since

The Cinnamon Peeler. The exquisite poems collected here draw on history, mythology, landscape, and personal memories to weave a rich tapestry of images that reveal the longing for--and expose the anguish over--lost loves, homes, and language, as the poet contemplates scents and gestures and evokes a time when "handwriting occurred on waves, / on leaves, the scripts of smoke" and remembers a woman's "laughter with its / intake of breath. Uhh huh." Crafted with lyrical delicacy and seductive power, Handwriting reminds us of Michael Ondaatje's stature as one of the finest poets writing today.

Strategies for Writers 2003 Master Books Alphabet Tracing, Letters A-Z, provides extensive focus on alphabet tracing and printed letter formation for the preschool and kindergarten beginning writer. The full-page format focuses on one alphabet at a time, which allows additional alphabet tracing practice for the beginning writer. This children's handwriting workbook has a minimum of 30 opportunities to trace each alphabet before free-writing practice pages are presented. Once a student has adequately mastered tracing each alphabet they may then move on to the next section or skip around to other alphabets as comfortable. Daily penmanship practice will help increase your student's ability to:

- Print uppercase and lowercase letters of the alphabet and recognize the difference between the two.
- Write from left to right and top to bottom of page.
- Recognize spacing between printed alphabet letters and eventually words.
- Understand the concept of writing letters.
- Write words and brief sentences that are legible.
- Write his/her own first and last name and other important words.

Some neurologists advocate writing to learn. One states, "The practice of writing can enhance the brain's intake, processing, retaining, and retrieving of information. Through writing, students can increase their comfort with and success in understanding complex material, unfamiliar

concepts, and subject-specific vocabulary." Preschool and Kindergarten is the perfect time to prepare for alphabet tracing and handwriting practice since preschool, kindergarten and 1st grade students do not have to prepare for assessments. Focus can instead be placed on their literacy development. Reading to children and talking to them directly can be huge. Parents can start conversations-helping to build verbal vocabulary, write a grocery list together-helping to practice handwriting skills, and select books together at the library-allowing students to enjoy the usefulness of the printed word. Another way to raise their awareness of language in their environment is to point to street signs, billboards, traffic signs, and menus in restaurants-saying the whole word and/or pointing to each individual alphabet while saying calling out each letter. This alphabet tracing workbook for preschool, kindergarten, and 1st grade is a perfect companion to online and computerized alphabet software to teach kids alphabet recognition. It can be used on short and long car rides. Getting students used to using paper workbooks will give them a distinct advantage over students who have only used wipe clean alphabet books and computerized alphabet software-this alphabet tracing book is similar to the writing, social studies, and language arts workbooks students will use in their classrooms.
