The Classic Texts Series is the only of its kind selection of classic pieces of work that started off as bestseller and continues to be the bestseller even today. These classic texts have been designed so as to work as elementary textbooks which play a crucial role in building the concepts from scratch as in-depth knowledge of concepts is necessary for students preparing for various entrance exams. The present book on Higher Algebra presents all the elements of Higher Algebra in a single book meant to work as textbook for the students beginning their preparation of the varied aspects covered under Higher Algebra. The present book has been divided into 35 chapters namely Ratio, Proportion, Variation, Arithmetical Progression, Geometrical Progression, Harmonical Progression Theorems Connected with The Progression, Scales of Notation, Surds & Imaginary Quantities, The Theory of Quadratic Equations, Miscellaneous Equations, Permutations & Combinations, Mathematical Induction, Binomial Theorem Positive Integral Index, Binomial Theorem, Any Index, Multinomial Theorem, Logarithms, Exponential & Logarithmic Series, Interest & Annuities, Inequalities, Limiting Values & Vanishing Fractions, Convergency & Divergency of Series, Undetermined Coefficients, Partial Fractions, Recurring Series, Continued Fractions, Recurring Series, Continued Fractions, Indeterminate Equations of the First Degree, Recurring Continued Fractions, Indeterminate Equations of the Second Degree, Summation of Series, Theory of Numbers, The General Theory of Continued Fractions, Probability, Determinants, Miscellaneous Theorems & Examples and Theory of Equations, each subdivided into number of topics. The first few chapters in the book have been devoted to a fuller discussion of Ratio, Proportions, Variation and the Progressions. Both the theoretical text as well as examples have been treated minutely which will help in better understanding of the concepts covered in the book. Theoretical explanation of the concepts in points has been provided at the beginning of each chapter. At the end of each chapter, unsolved practice exercises have been provided to help aspirants revise the

concepts discussed in the chapter. At the end of chapterwise study, miscellaneous examples have also been given along with answers and solutions to the unsolved examples covered in each chapter. All the relevant theorems covered under the syllabi of Higher Algebra have also been covered in the detail in this book. As the book covers the whole syllabi of Higher Algebra in detail along with ample number of solved examples, it for sure will help the students perfect the varied concepts covered under the Higher Algebra section.

A requisite countertop companion for all home chefs, *Keys to Good Cooking* distills the modern scientific understanding of cooking and translates it into immediately useful information. The book provides simple statements of fact and advice, along with brief explanations that help cooks understand why, and apply that understanding to other situations. Not a cookbook, *Keys to Good Cooking* is, simply put, a book about how to cook well. A work of astounding scholarship and originality, this is a concise and authoritative guide designed to help home cooks navigate the ever-expanding universe of recipes and ingredients and appliances, and arrive at the promised land of a satisfying dish.

**Green River Rising** Springer Nature

This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer

behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

The magic of brands is as old as Coke and as young as Tango. But getting beneath the packaging to understand a brand's winning technique is tough. Why do Kellogg's or Barbie still remain the consumer's friend? Why should a computer name or a sporting logo win favour with consumers worldwide? The World's Greatest Brands asks such key questions of over 350 of the world's leading brands. Explanations of a brand's history, its management and exploitation will appeal to the expert and the consumer. Anecdotes and analysis are combined to explain the science and art that have contributed to great branding case histories. Also included here is branding consultancy Interbrand's ranking of the world's 100 most powerful brands along with their assessment of brand owners' skills and winning techniques. This is a unique compilation on a subject with a fascination for all consumers. No-one who enjoys the benefits of great brands can fail to enjoy and profit from this book.

"Wise, witty, readable, and very, very useful. A tour de force from the world's leading authority on branding."  
—Anthony Hopwood, Said Business School, Oxford Brands are a cultural phenomenon of our time. Yet, whether praised or derided, they have suffered from a critical debate characterized by routine thinking, glib assumptions, or mere prejudice. Wally Olins draws on a lifetime of marketing experience to explain why it is time to throw the old mission statements away, what happens when a brand goes global, when we shouldn't automatically assume that the customer comes first, and how it might be good news that branding is set to spread even further. Above all, Olins provides a positive rejoinder to the new orthodoxies of the "No Logo" critics of branding by showing how they confuse their views about brands with their views about capitalism. As he argues, brands are no longer just about corporations, products, and services. In fact, all the significant institutions in our lives—the towns, cities, regions, or

countries in which we live, our sports teams and museums, our consumer groups and charities—are given strength, identity, a defining role, and a satisfying cohesion via branding, one of the most significant social—as well as business—developments of modern times. Always wise, questioning, and iconoclastic, Wally Olins takes us to the literal heart of the matter: our crucial neglect of the way in which consumer decisions about brands are as emotional as all the other important decisions in our lives. For everyone in marketing, advertising, design, and business, and for anyone who wants to understand how the world works in the early twenty-first century, this is one of those rare books that breaks the mold.

First published in 1925, The City is a trailblazing text in urban history, urban sociology, and urban studies. Its innovative combination of ethnographic observation and social science theory epitomized the Chicago school of sociology. Robert E. Park, Ernest W. Burgess, and their collaborators were among the first to document the interplay between urban individuals and larger social structures and institutions, seeking patterns within the city's riot of people, events, and influences. As sociologist Robert J. Sampson notes in his new foreword, though much has changed since The City was first published, we can still benefit from its charge to explain where and why individuals and social groups live as they do.

This book provides readers with a timely snapshot of ergonomics research and methods applied to the design, development and prototyping—as well as the evaluation, training

and manufacturing—of products, systems and services.

Combining theoretical contributions, case studies and reports on technical interventions, it covers a wide range of topics in ergonomic design including ecological design; cultural and ethical aspects in design; interface design, user involvement and human – computer interaction in design; as well as design for accessibility and many others. The book particularly focuses on new technologies such as virtual reality, state-of-the-art methodologies in information design, and human – computer interfaces. Based on the AHFE 2020 Virtual Conference on Ergonomics in Design, held on July 10 – 16, 2020, the book offers a timely guide for both researchers and design practitioners, including industrial designers, human – computer interaction and user experience researchers, production engineers and applied psychologists.

**The Dishwasher Manual** New Directions Publishing  
The Brazilian multi-instrumentalist, composer, and bandleader Hermeto Pascoal produces music that is unmistakably individual, drawing on a kaleidoscopic variety of influences, including contemporary jazz and the popular musical styles of the Northeast of Brazil, such as *cocos*, *emboladas* and *repentes*, as well as *baião*, *frevo* and *choro*, with results verging on contemporary art music. His complex compositions are highly demanding of the performer, with use of dissonant harmonies, polyrhythms, unconventional timbres, atonal improvisations, aleatory techniques and more. He became known to American musicians and music-lovers through a brief period working with the late Miles Davis, and through a remarkable series of recordings for Warner and the Brazilian label *Som Da Gente*. Luiz Costa-Lima Neto's book is the first publication in English focusing on the work of this musical genius, looking at music produced between 1981 and 1993. During this period Hermeto worked with a group of five musicians in an ensemble that was called "Hermeto Pascoal e Grupo". Working with Hermeto were Itibere Luis Zwarg (electric bass, tuba and bombardon), Jovino Santos Neto (piano, keyboard, flutes), Antonio Luis Santana ("Pernambuco") - (percussion), Carlos Daltro Malta (saxophones, flutes, piccolo) and Marcio Villa Bahia (drum kit and percussion). Luiz Costa-Lima Neto explores the sources of Hermeto's experimental music, their development and characteristics, and describes how these were transformed into a musical system. He reconstructs the processes of creation and music-making by the group, with analysis of a selection of the ensemble's pieces, and demonstrates the innovative role played by Hermeto Pascoal in the history of popular music in Brazil, fusing regional, national, and international elements to create a universal music which continues to affirm its roots.

**Power Converter with Digital Filter Feedback Control** presents a logical sequence that leads to the identification, extraction, formulation, conversion, and implementation for the control function needed in electrical power equipment systems. This book builds a bridge for moving a power converter with conventional analog feedback to one with modern digital filter control and enlists the state space averaging technique to identify the core control function in analytical, closed form in *s*-domain (Laplace). It is a useful reference for all professionals and electrical engineers engaged in electrical power equipment/systems design, integration, and management.

Offers logical sequences to identification, extraction, formulation, conversion, and implementation for the control function needed. Contains step-by-step instructions on how to take existing analog designed power processors and move them to the digital realm. Presents ways to extract gain functions for many power converters' power processing stages and their supporting circuitry.
