This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information

programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

Bitcoin first appeared in 2009, and it's already challenging everything we've come to accept about money, financial institutions, and even government. The digital currency can be nearly anonymous. And it can be traded internationally—without the fees, government regulation, and bank oversight of paper money. But Bitcoin is still risky. Its value fluctuates wildly. More than \$400 billion of it disappeared overnight with the fall of a single trading exchange. How is that possible? And why is it so popular? CNNMoney reporter Jose Pagliery explains it all. He details the digital currency's mysterious origins. He explores the dark side of Bitcoin: a world of drugs and assassins for hire. And he examines the economic impact of this revolutionary concept through interviews with pensive economists, wary bank regulators, and free market proponents such as Ron Paul. *Bitcoin: And the Future of Money* explains how it works and why it matters. The book is essential reading for anyone looking to understand a financial innovation that will forever change how we think about money.

In this long-awaited book (already a major bestseller in Italy) Ginsborg has created a fascinating, sophisticated and definitive account of how Italy has coped, or failed to cope, with the past two decades. Contemporary Italy strongly mirrors Britain - the countries have roughly the same extent, population size and GNP - and yet they are fantastically different. Ginsborg sees this difference as most fundamentally clear in the role of the family and it is the family which is at the heart of Italian politics and business. Anyone wishing to understand contemporary Italy will find it essential to have this enormously attractive and intelligent book.

In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding disease mechanisms and developing therapeutic strategies in blood cancers. The authors do not intend to cover all types of blood cancers; instead, they will focus on some major ones such as leukemias and lymphomas. However, the authors will try to cover as much

as they can the cancer types and point out that many blood cancers need to be studied in mouse disease models although they are still not available at present. A major focus in the book will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

"The Social Network meets Hammer of the Gods" in this story of a 1990s web titan who made a fortune and lost it all—and what happened afterward (The Independent). One day in February 2001, Josh Harris woke to certain knowledge that he was about to lose everything. The man Time magazine called "The Warhol of the Web" was reduced to a helpless spectator as his fortune dwindled from 85 million dollars to nothing, all in the space of a week. Harris had been a maverick genius preternaturally adapted to the new online world. He founded New York's first dotcom, Pseudo.com, and paved the way for a cadre of twentysomethings to follow, riding a wave of tech euphoria to unimagined wealth and fame for five years—before the great dotcom crash, in which Web 1.0 was wiped from the face of the earth. Long before then, though, Harris's view of the web had darkened, and he began a series of lurid social experiments aimed at illustrating his worst fear: that the internet would soon alter the very fabric of society—cognitive, social, political, and otherwise. In *Totally Wired*, journalist Andrew Smith seeks to unravel the opaque and mysterious episodes of the early dotcom craze, in which the seeds of our current reality were sown. Drawing on in-depth interviews with Harris and those who worked alongside him in downtown Manhattan's "Silicon Alley,"

the tale moves from a compound in Ethiopia through New York, San Francisco, Las Vegas, London, and Salt Lake City, Utah; from the dawn of the web to the present, taking in the rise of alternative facts, troll society, and the unexpected origins of the net itself, as our world has grown uncannily to resemble the one Harris predicted—and urged us to evade. “Raucous, whimsical, sad and very funny...a fascinating account of what could have been, what briefly was, what almost lasted.” ?TheWall Street Journal “Told with verve and style...A valuable history.” ?Kirkus Reviews “A brilliant exploration of madness and genius in the early days of the web.”?The Guardian “Dark and compelling.”?Daily Mail “This is a book whose time has come.”?Sunday Times
