How We Are Hungry is a gripping, lyrical and soulful collection of stories from the acclaimed author of *A Heartbreaking Work of Staggering Genius*. Ranging from a doomed Irish setter's tales of running and jumping (" After I Was Thrown in the River and Before I Drowned ") to a bitterly comic meditation on suicide and friendship (" Climbing to the Window, Pretending to Dance "), and from the Egyptian desert to the asphalt of Interstate 5, these stories are Eggers at his finest. By turns devastating, clear-eyed and funn – incredibly funny – this collection is a marvel.

And so, Max appoints himself their king. Here, on a magnificent adventure with the creatures, Max can be the wildest thing of all. In this visionary new novel, Eggers brings an imaginary world vividly to life, filling it with monsters, chaos, and one very real little boy. The Pot Book Random House

A riveting account of Hurricane Katrina and a shocking tale of wrongful arrest and racism, *Zeitoun* is the true story of one Syrian-American, plucked from his home and accused of terrorism, written by one of America's most high-profile literary writers, now available for the first time in paperback from Vintage Canada. When Hurricane Katrina struck New Orleans, Abdulrahman Zeitoun, a prosperous Syrian-American and father of four, chose to stay through the storm to protect his house and contracting business. In the days after the storm, he traveled the flooded streets in a secondhand canoe, passing on supplies and helping those he could. A week later Zeitoun abruptly disappeared. Eggers's riveting nonfiction book, three years in the making, explores Zeitoun's roots in Syria, his marriage to Kathy — an American who converted to Islam — and their children, and the surreal atmosphere in which what happened to

Abdulrahman Zeitoun was possible. Like *What Is the What*, *Zeitoun* was written in close collaboration with its subjects and involved vast research — in this case, in the United States, Spain, and Syria.

The #1 New York Times bestseller from David McCullough, two-time winner of the Pulitzer Prize—the dramatic story-behind-the-story about the courageous brothers who taught the world how to fly—Wilbur and Orville Wright. On a winter day in 1903, in the Outer Banks of North Carolina, two brothers—bicycle mechanics from Dayton, Ohio—changed history. But it would take the world some time to believe that the age of flight had begun, with the first powered machine carrying a pilot.

Orville and Wilbur Wright were men of exceptional courage and determination, and of far-ranging intellectual interests and ceaseless curiosity. When they worked together, no problem seemed to be insurmountable. Wilbur was unquestionably a genius. Orville had such mechanical ingenuity as few had ever seen. That they had no more than a public high school education and little money never stopped them in their mission to take to the air. Nothing did, not even the self-evident reality that every time they took off, they risked being killed. In this "enjoyable, fast-paced tale" (The Economist), master historian David

McCullough "shows as never before how two Ohio boys from a remarkable family taught the world to fly" (The Washington Post) and "captures the marvel of what the Wrights accomplished" (The Wall Street Journal). He draws on the extensive Wright family papers to profile not only the brothers but their sister, Katharine, without whom things might well have gone differently for them. Essential reading, this is "a story of timeless importance, told with uncommon empathy and fluency...about what might be the most astonishing feat mankind has ever accomplished...The Wright Brothers soars" (The New York Times Book Review).

Malnutrition is a huge burden on the Arab Republic of Egypt's economy. Undernutrition—manifested by poor linear growth (stunting), wasting, and micronutrient deficiencies in children and by anemia among women of reproductive age—collectively saps an estimated two percent of Egypt's annual gross domestic product through forgone productivity and health care costs, representing an economic hemorrhaging of billions of U.S. dollars per year. Adding to this challenge is the co-occurrence of overweight and obesity among children, leading to a malnutrition double burden. Scaling Up Nutrition in the Arab Republic of Egypt aims to inform the development of nutrition policy and guide nutrition investments over the coming years. It reviews Egypt's nutrition situation, the interventions currently in place, and the opportunities, costs, benefits, and fiscal space implications of scaling up a set of high-impact interventions to address undernutrition. The book, a collaborative effort between the World

Bank and UNICEF, is targeted at all those involved in developing and implementing nutrition interventions in Egypt and beyond.

A decade in the making, Emily Raboteau’s *Searching for Zion* takes readers around the world on an unexpected adventure of faith. Both one woman’s quest for a place to call “home” and an investigation into a people’s search for the Promised Land, this landmark work of creative nonfiction is a trenchant inquiry into contemporary and historical ethnic displacement. At the age of twenty-three, award-winning writer Emily Raboteau traveled to Israel to visit her childhood best friend. While her friend appeared to have found a place to belong, Raboteau could not yet say the same for herself. As a biracial woman from a country still divided along racial lines, she’d never felt at home in America. But as a reggae fan and the daughter of a historian of African-American religion, Raboteau knew of “Zion” as a place black people yearned to be. She’d heard about it on Bob Marley’s *Exodus* and in the speeches of Martin Luther King. She understood it as a metaphor for freedom, a spiritual realm rather than a geographical one.

Now in Israel, the Jewish Zion, she was surprised to discover black Jews. More surprising was the story of how they got there. Inspired by their exodus, Raboteau sought out other black communities that left home in search of a Promised Land. Her question for them is same she asks herself: have you found the home you're looking for? On her ten-year journey back in time and around the globe, through the Bush years and into the age of Obama, Raboteau wanders to Jamaica, Ethiopia, Ghana, and the American South to explore the complex and contradictory perspectives of Black Zionists. She talks to Rastafarians and African Hebrew Israelites, Evangelicals and Ethiopian Jews, and Katrina transplants from her own family—people that have risked everything in search of territory that is hard to define and harder to inhabit. Uniting memoir with historical and cultural investigation, Raboteau overturns our ideas of place and patriotism, displacement and dispossession, citizenship and country in a disarmingly honest and refreshingly brave take on the pull of the story of Exodus.

Numbersense: How to Use Big Data to Your Advantage Cambridge University Press

How to make simple sense of complex statistics--from the author of Numbers Rule Your World We live in a world of Big Data--and it's getting bigger every day. Virtually every choice we make hinges on how someone generates data . . . and how someone else interprets it--whether we realize it or not. Where do you send your child for the best education? Big Data. Which airline should you choose to ensure

a timely arrival? Big Data. Who will you vote for in the next election? Big Data. The problem is, the more data we have, the more difficult it is to interpret it. From world leaders to average citizens, everyone is prone to making critical decisions based on poor data interpretations. In Numbersense, expert statistician Kaiser Fung explains when you should accept the conclusions of the Big Data "experts"--and when you should say, "Wait . . . what?" He delves deeply into a wide range of topics, offering the answers to important questions, such as: How does the college ranking system really work? Can an obesity measure solve America's biggest healthcare crisis? Should you trust current unemployment data issued by the government? How do you improve your fantasy sports team? Should you worry about businesses that track your data? Don't take for granted statements made in the media, by our leaders, or even by your best friend. We're on information overload today, and there's a lot of bad information out there. Numbersense gives you the insight into how Big Data interpretation works--and how it too often doesn't work. You won't come away with the skills of a professional statistician. But you will have a keen understanding of the data traps even the best statisticians can fall into, and you'll trust the mental alarm that goes off in your head when something just doesn't seem to add up. Praise for Numbersense "Numbersense correctly puts the emphasis not on the size of big data, but on the analysis of it. Lots of fun stories, plenty of lessons learned—in short, a great way to acquire your own sense of numbers!" Thomas H. Davenport, coauthor of Competing on Analytics and President's Distinguished Professor of IT and Management, Babson College "Kaiser's accessible business book will blow your mind like no other. You'll be smarter, and

you won't even realize it. Buy. It. Now." Avinash Kaushik, Digital Marketing Evangelist, Google, and author, *Web Analytics 2.0* "Each story in *Numbersense* goes deep into what you have to think about before you trust the numbers. Kaiser Fung ably demonstrates that it takes skill and resourcefulness to make the numbers confess their meaning." John Sall, Executive Vice President, SAS Institute "Kaiser Fung breaks the bad news—a ton more data is no panacea—but then has got your back, revealing the pitfalls of analysis with stimulating stories from the front lines of business, politics, health care, government, and education. The remedy isn't an advanced degree, nor is it common sense. You need *Numbersense*." Eric Siegel, founder, Predictive Analytics World, and author, *Predictive Analytics* "I laughed my way through this superb-useful-fun book and learned and relearned a lot. Highly recommended!" Tom Peters, author of *In Search of Excellence*

The Wright Brothers Hachette Books

From the bestselling author of *The Monk of Mokha* and *The Circle* comes a taut, suspenseful story of two foreigners' role in a nation's fragile peace. An unnamed country is leaving the darkness of a decade at war, and to commemorate the armistice the government commissions a new road connecting two halves of the state. Two men, foreign contractors from the same company, are sent to finish the highway. While one is flighty and adventurous, wanting to experience the nightlife and people, the other wants only to do the work and go home. But both men must eventually face the absurdities of their positions, and the dire consequences of their presence. With echoes of J. M. Coetzee and Graham Greene, this timeless novel questions whether we can ever understand another nation's war, and what role we have in forging anyone's peace.
