Family and home are one word--jia--in the Chinese language. Family can be separated and home may be relocated, but jia remains intact. It signifies a system of mutual obligation, lasting responsibility, and cultural values. This strong yet flexible sense of kinship has enabled many Chinese immigrant families to endure long physical separation and accommodate continuities and discontinuities in the process of social mobility. Based on an analysis of over three thousand family letters and other primary sources, including recently released immigration files from the National Archives and Records Administration, Haiming Liu presents a remarkable transnational history of a Chinese family from the late nineteenth century to the 1970s. For three generations, the family lived between the two worlds. While the immigrant generation worked hard in an herbalist business and asparagus farming, the younger generation crossed back and forth between China and America, pursuing proper education, good careers, and a meaningful life during a difficult period of

time for Chinese Americans. When social instability in China and hostile racial environment in America prevented the family from being rooted in either side of the Pacific, transnational family life became a focal point of their social existence. This well-documented and illustrated family history makes it clear that, for many Chinese immigrant families, migration does not mean a break from the past but the beginning of a new life that incorporates and transcends dual national boundaries. It convincingly shows how transnationalism has become a way of life for Chinese American families.

We live in the age of big companies where rising levels of power are concentrated in the hands of a few. Yet no government or organisation has the power to regulate these titans and hold them to account. We need big companies to share their power and we, the people of the world, need to reclaim it. In *Competition is Killing Us*, top business and competition lawyer Michelle Meagher establishes a new framework to control capitalism from the inside in order to make it work for the many and not just the few. Meagher has spent years campaigning against these multi-billion and trillion dollar mammoths that dominate the market and prioritise shareholder profits over all else; leading to extreme wealth inequality, inhumane conditions for workers and relentless pressure on the environment. In this revolutionary book, she introduces her wholly-

achievable alternative; a fair and comprehensive competition law that limits unfair mergers, enforces accountability and redistributes power through stakeholder governance.

This unique study explores the vampire as host and guest, captor and hostage: a perfect lover and force of seductive predation. From *Dracula* and *Carmilla*, to *True Blood* and *The Originals*, the figure of the vampire embodies taboos and desires about hospitality, rape and consent. The first section welcomes the reader into ominous spaces of home, examining the vampire through concepts of hospitality and power, the metaphor of threshold, and the blurred boundaries

between visitation, invasion and confinement. Section two reflects upon the historical development of vampire narratives and the monster as oppressed, alienated Other. Section three discusses cultural anxieties of youth, (im)maturity, childhood agency, abuse and the age of consent. The final section addresses vampire as intimate partner, mapping boundaries between invitation, passion and coercion. With its fresh insight into vampire genre, this book will appeal to academics, students and general public alike.

Well-grounded in the history and theory of Anglo-American urbanism, this illustrated textbook sets out objectives, policies and design principles for planning new communities and redeveloping existing urban neighborhoods. Drawing from their extensive experience, the authors explain how better plans (and consequently better places) can be created by applying the three-dimensional principles of urban design and physical place-making to planning problems. *Design First* uses case studies from the authors' own professional projects to demonstrate how theory can be turned into effective

practice, using concepts of traditional urban form to resolve contemporary planning and design issues in American communities. The book is aimed at architects, planners, developers, planning commissioners, elected officials and citizens -- and, importantly, students of architecture and planning -- with the objective of reintegrating three-dimensional design firmly back into planning practice.
