This book identifies and analyzes the genetic basis
of bone disorders in humans and demonstrates the
utility of mouse models in furthering the
knowledge of mechanisms and evaluations of
treatments. The book is aimed at all students of
bone biology and genetics, and with this in mind, it
includes general introductory chapters on genetics
and bone biology and more specific disease-

orientated chapters, which comprehensively summarize the clinical, genetic, molecular genetic, animal model, functional and molecular pathology, diagnostic, counselling and treatment aspects of each disorder. Saves academic, medical, and pharma researchers time in quickly accessing the very latest details on a broad range of genetic bone issues, as opposed to searching through thousands of journal articles. Provides a common language for bone biologists and geneticists to discuss the development of bone cells and genetics and their interactions in the development of disease. Researchers in all areas bone biology and genetics will gain insight into how clinical observations and practices can feed back into the research cycle and will, therefore, be able to develop more targeted genomic and proteomic assays. For those clinical researchers who are also MDs, correct diagnosis (and therefore correct treatment) of bone diseases depends on a strong understanding of the molecular basis for the disease.

Poetry. "Of the many ways of knowing the world, Stacie Cassarino in her elegant and poignant first book of poems, ZERO AT THE BONE, reminds us of the primacy of the senses. She tells us 'our mouths try to get it right' or that the 'mouth of the trees' will swallow us whole, by which she means taste is the most direct authenticator of experience and also the most defenseless because it's instruments of lips and tongue are eager. As a result, her great pre-occupation is with the

vulnerability of human relationships, but as the title of the book suggests, Cassarino is fearless in her explorations of the risks. She knows 'you've got to live like everything will hurt you'" --Michael Collier.
