From any perspective, the ideal construction project is one in which the contractor shows up on your doorstep with the right price and all of his tools, people, and equipment ready to start, and builds exactly what you want for the price you want and finish on schedule.

Everyone then goes away, happy as clams. This is the ideal, but it never occurs. The world is a competitive place; to survive, contractors must think competitively in order to win

work. They must find a way to complete a quality project for the lowest price. Circumstances can easily derail even the best plans and contractors, but with planning, delays and cost overruns can be minimized. This handbook helps guide the construction manager through the trials and tribulations of selecting, expecting, rejecting, prompting, requiring, and documenting what the contractor produces on the project. Contracts can be written that foresee common problems and provide the construction manager with their resolution. The concepts in Field

Guide for Construction Management can help you do just that.

How do drama serials communicate development goals and achieve dramatic impact? What is involved in translating storylines, such as those from the BBC's longest running radio soap opera, *The Archers*, for diverse local cultural contexts? Can drama serials bring about positive social change? This book offers unprecedented insights into the production and consumption of a range of popular radio and television drama serials, broadcast in places as diverse as Afghanistan, Burma, Cambodia, Nepal, Pakistan, India, Nigeria and Rwanda. It brings into dialogue the perspectives of the creative teams who make 'dramas for development', the donors who pay for them, and the audiences who consume them. It also highlights the crucial role of audience research as a tool for making drama and as a resource for translating cultures. This book emerges from a unique research collaboration over a three year period between The Open University, the University of Adelaide, and the BBC

World Service Trust. This path-breaking initiative opens windows on the intertwined worlds of media and development for academics and audiences alike. Cultural translation means different things for dramatists, development practitioners, donors, audiences, and scholars. Their interests may collude or collide. What accommodations and adjustments are entailed in transnational circuits of serial drama production? What imaginative investments are required on the part of dramatists unfamiliar with local cultures? What cultural assumptions need to be exploded to reach audiences? This book offers an innovative framework for analysing drama for development that will appeal to practitioners and academics alike.

The states of Pohnpei and Yap in the Federated States of Micronesia currently produce limited amount of food locally. Exporting food is also limited therefore importing substantial quantities of

vegetables, fruits and root crops amounts to millions of dollars annually. This is partly owing to a lack of necessary information on crop production locally to assist producers in their production. To help contribute to rectifying this situation, this manual is aimed to provide guidelines for farmers and producers on seedling production and management, plant spacing, cropping program, soil fertility and crop protection.

Deryn Watson CapBIT 97, Capacity Building for Information Technologies in Education in Developing Countries, from which this publication derives, was an invited IFIP working conference sponsored by Working Groups in secondary (WG 3. 1), elementary (WG 3. 5), and vocational and professional (WG 3. 4) education under the auspices of IFIP Technical Committee for Education (TC3). The conference was held in Harare, Zimbabwe 25th - 29th August 1997. CapBIT '97 was the first time that the IFIP Technical Committee for Education had held a conference in a developing country. When the Computer Society of Zimbabwe offered to host the event, we determined that the location and conference topic reflect the importance of issues facing countries at all stages of development—especially Information Technologies (IT) development. Information Technologies have become, within a short time, one of the basic building blocks of modern industrial society. Understanding IT,

and mastering basic skills and concepts of IT, are now regarded as part of the core education of all people around the world, alongside reading and writing. IT now permeates the business environment and underpins the success of modern corporations as well as providing government with cost-effective civil service systems. At the same time, the tools and technologies of IT are of value in the process of learning, and in the organisation and management of learning institutions.

The ocean and its inhabitants sketch and stretch our understandings of law in unexpected ways. Inspired by the blue turn in the social sciences and humanities, Blue Legalities explores how regulatory frameworks and governmental infrastructures are made, reworked, and contested in the oceans. Its interdisciplinary contributors analyze topics that range from militarization and Maori cosmologies to island building in the South China Sea and underwater robotics. Throughout, Blue Legalities illuminates the vast and unusual challenges associated with regulating the turbulent materialities and lives of the sea. Offering much more than an analysis of

legal frameworks, the chapters in this volume show how the more-than-human ocean is central to the construction of terrestrial institutions and modes of governance. By thinking with the more-than-human ocean, Blue Legalities questions what we think we know—and what we don't know—about oceans, our earthly planet, and ourselves. Contributors. Textile as a material of daily use has been there for ages now and as an industry, it is one of the promising industries. Textile Industry will always be there as clothes are one of the basic human necessities. For making textile, there is always the need of textile designers who design the textiles. Textile design is basically the process of creating designs for knitted, woven or printed fabrics. Fabrics can be made by weaving and knitting and can be given basic decoration through printing. Textile designing is a technical process including different methods for production of textile. It includes both- surface design and structural design of a textile. Textile designer must have knowledge of yarn making, weaving, knitting, dyeing, finishing processes, and also knowledge about different types of looms, knitting machines, and printing processes. The designer's deep understanding of the technical aspects of production and the properties of fibers, yarns, and textile dyes help him in visualizing the end product. Textile Technology and Design describes the strategies

and technologies that have propelled the forefront of apparel textile innovation. The concept of the textile technologies is intricately related to both, the manufacture and decoration. It addresses the critical role of the interior at the intersection of design and technology, with a range of interdisciplinary arguments by a wide range of contributors: from design practitioners to researchers and scholars.

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on ' Technical and Vocational Education and Training: Issues, Concerns and Prospects ' and compliments the ' International Handbook of Technical

and Vocational Education and Training ' and other publications in the ' International Library of TVET ' all of which are publications of the ' UNESCO-UNEVOC International Centre for TVET ' in Bonn, Germany
