Pros and Cons: A Debaters
Handbook offers a unique and

invaluable guide to the arguments both for and against over 140 current controversies and global issues. Since it was first published in 1896 the handbook has been regularly updated and this nineteenth edition includes new entries on topics such as the right to possess nuclear weapons, the bailing out of failing industries, the protection of indigenous languages and the torture of suspected terrorists. Equal coverage is given to both sides of each debate in a dual column format which allows for easy comparison. Each entry also includes a list of related

topics and suggestions for possible motions. The introductory essay describes debating technique, covering the rules, structure and type of debate, and offering tips on how to become a successful speaker. The book is then divided into eight thematic sections, where specific subjects are covered individually.

An overview of the ongoing methods used to understand African history.

Spurred in part by the ongoing re-evaluation of sources and methods in research, African historiography in the past two decades has been

characterized by the continued

branching and increasing sophistication of methodologies and areas of

specialization. The rate of

incorporation of new sources and

methods into African historical

research shows no signs of slowing.

This book is both a snapshot of

current academic practice and an

attempt to sort through some of the problems scholars face within this unfolding web of sources and methods.

The book is divided into five sections, each of which begins with a short introduction by a distinguished

Africanist scholar. The first section deals with archaeological contributions to historical research.

The second section examines the methodologies involved in deciphering historically accurate African ethnic

identities from the records of the trans-Atlantic slave trade. The third section

mines old documentary sources for new historical perspectives. The fourth

section deals with the method most often associated with African

historians, that of drawing historical

data from oral tradition. The fifth section is devoted to essays that present innovative sources and methods for African historical research. Together, the essays in this cutting-edge volume represent the current state of the art in African historical research. This retrospective offers a first hand account on internal conflicts in ZANU during the 1970s, which resulted in the defeat of its left wing.

Chung's narratives include her experiences in two guerrilla camps. She recalls her encounters with the charismatic Josiah Tongogara, a legendary military commander during Zimbabwe's liberation war (known as the second chimurenga), who died at the threshold to Independence. The personal recollection of a transition to national sovereignty concludes with an incisive analysis of developments after Independence. It ends with Chung's vision for the Zimbabwe of the future. Fay Chung served within the Ministry of Education in post-colonial Zimbabwe for a total of fourteen years, at the end as the Minister of Education and Culture. Her autobiographical account has the childhood

experiences in colonial Rhodesia as a point of departure. Like many other Zimbabwean intellectuals she joined the liberation struggle. From the mid-1970s she worked within the ZANU-organised educational sphere. New General Mathematics for Junior Secondary Schools Swipe Educational Solutions Originally published in two volumes between 1923 and 1925, *Africa for Africans; Or, The Philosophy and Opinions of Marcus Garvey* is a compilation of letters, speeches and essays by one of the Fathers of Pan-Africanism. Hailed by Martin Luther King Jr. as, "the first man of color...to make the Negro feel like he was somebody," Garvey was a polarizing yet influential figure whose legacy continues to be felt today. These philosophies, collected by his second wife and pioneering journalist, Amy Jacques Garvey, chronicle Garvey's initial

impressions and recollections of America, the formation of the Universal Negro Improvement Association (U.N.I.A.), his imprisonment and subsequent trial over the Black Star Line, and his scathing opinions of the National Association for the Advancement of Colored People (N.A.A.C.P.) Including such pieces as, "An Appeal to the Soul of White America," "The Negro's Greatest Enemy," and "Declaration of Rights of the Negroes of the World," Africa for Africans; Or, The Philosophy and Opinions of Marcus Garvey is an essential piece of Black history, professionally typeset and reimagined for modern readers.

With unique access to Chinese leaders at all levels of the party and government, best-selling author David M. Lampton tells the story of China's political elites from their own perspectives. Based on over five hundred interviews, *Following the Leader* offers a rare glimpse into how the attitudes

and ideas of those at the top have evolved over the past four decades. Here China's rulers explain their strategies and ideas for moving the nation forward, share their reflections on matters of leadership and policy, and discuss the challenges that keep them awake at night. As the Chinese Communist Party installs its new president, Xi Jinping, for a presumably ten-year term, questions abound. How will the country move forward as its explosive rate of economic growth begins to slow? How does it plan to deal with domestic and international calls for political reform and to cope with an aging population, not to mention an increasingly fragmented bureaucracy and society? In this insightful book we learn how China's leaders see the nation's political future, as well as about its global strategic influence.

Since the financial crisis of 2008, the major governments of the world have resorted to printing large amounts of money to pay national debts and bail out banks. The warning signs are clear, and the collapse of the Zimbabwean dollar after years of rampant money printing is a frightening example of what lies in store for world economies if painful reform is not executed. When Money Destroys Nations tells the gripping story of the disintegration of the once-thriving Zimbabwean economy and how ordinary people survived in turbulent circumstances. Analysing this case within a global context,

Philip Haslam and Russell Lamberti investigate the causes of hyperinflation and draw ominous parallels between Zimbabwe and the world's developed economies. The looming currency crises and hyperinflation in these major economies, particularly the United States, have the potential to turn the current world order upside down. This story of how money destroys nations holds lessons that cannot be ignored.
