The essays within this collection explore the possibilities and potentialities of all three positions, presenting encounters that are, at times contradictory, at other times supportive, as well as complementary. The collection thereby enriches the questions that are being

raised within contemporary cinematic studies.

This book explores tried and tested strategies that support student and faculty engagement and inclusion in the academy. These strategies are anchored by a brief exploration of the history and effect/s of exclusion and deprivilege in higher education. However, while many publications exploring academic inequality focus on the causes and impacts of structural, psychological and cultural exclusion based on racism, sexism, classism and ableism, they rarely engage in interventions to expose and combat such de/privilege. Capturing examples of inclusive practices that are as diverse as student and faculty populations, these strategies can be easily translated and employed by organisations, collectives and individuals to recognise and combat social and academic exclusion within higher education environments.

Parasitology: A Conceptual Approach is a new textbook for upper-level undergraduate and graduate students which focuses on concepts and principles without neglecting important aspects of a traditional, taxonomically based approach to parasitology. Concentrating on concepts enables readers to gain a broader perspective that will increase their ability to think critically about various parasitic associations. The interfaces between the study of parasitism and

prominent biological disciplines such as biodiversity, immunology, ecology, evolution, conservation biology, and disease control are highlighted. End-of-chapter questions are provided, as is an Instructor Manual. Information on individual parasites is expertly summarized in a concise appendix called the Rogues' Gallery. This appendix is organized taxonomically and includes details on taxonomy, life cycle, associated pathology, treatment, and control. Species included in the Rogues' Gallery are highlighted in red throughout the main text.

Therapists and other helping professionals, such as teachers, doctors and nurses, social workers, and clergy, work in highly demanding fields and can suffer from burnout, compassion fatigue, and secondary stress. This happens when they give more attention to their clients' well being than their own. Both students and practitioners in these fields will find this book an essential guide to striking an optimal balance between self-care and other-care. The authors describe the joys and hazards of the work, the long road from novice to senior practitioner, the essence of burnout, ways to maintain the

professional and personal self, methods experts use to maintain vitality, and a self-care action plan. Vivid real-life examples and self-reflection questions will engage and motivate readers to think about their own work and ways to enhance their own resilience. Eloquent written and supported by extensive research, helping professionals will find this a valuable resource both when a novice and when an experienced practitioner.

geriatric psychiatry and general psychiatry need to master core competencies in geriatric psychiatry in order to practice. This book is designed to provide short-answer question-based learning centering around the core curriculum topics in geriatric psychiatry and is primarily ideal not only for medical students, residents, and fellows, but also for psychiatrists preparing for re-certification. This book features approximately 300 short-answer questions on geriatric psychiatry topics, each comprising the stem of a brief clinical scenario or concise question with expected number of answers. The book also features detailed teaching notes, graphics, and the respective source references. The format is consistently structured from chapter to chapter, practical and concise, and designed to enhance the reader's diagnostic and management ability and clinical understanding. Each answer includes a concise discussion, pertinent illustrations, and source references. This text is a valuable reference and teaching tool that provides an opportunity for

learning across a rapidly growing field. The material covered matches the existing postgraduate curricula in geriatric psychiatry and helps prepare candidates for their specialty and subspecialty certification examinations. The cases map well to both the American Geriatric Psychiatry Association and Canadian Academy of Geriatric Psychiatry as well as other international postgraduate curricula. The book covers main topics within geriatric psychiatry, some such as substance use disorders and sexuality and sexual dysfunction in later life. As the Baby Boomers age, this reference will continue to be a valuable staple in geriatric workforce training. Geriatric Psychiatry Study Guide is the ultimate resource for students, residents, fellows, psychiatrists, psychologists, family practitioners, nurses, social workers, and all clinicians rising to the challenges of the mental health segment of the geriatric workforce.

Darlings of Decay (A Zombie Anthology) Re.Press

A timeless volume to be read

and treasured, *The Stone Reader* provides an unparalleled overview of contemporary philosophy. Once solely the province of ivory-tower professors and college classrooms, contemporary philosophy was finally emancipated from its academic closet in 2010, when *The Stone* was launched in *The New York Times*. First appearing as an online series, the column quickly attracted millions of readers through its accessible examination of universal topics like the nature of science, consciousness and morality, while also probing more contemporary issues such as the morality of drones, gun control and the gender divide. Now collected for the first time in this handsomely designed volume, *The Stone Reader* presents 133 meaningful and influential essays from the series, placing nearly the entirety of modern philosophical discourse at a reader's grasp. The book, divided into four broad sections—Philosophy, Science, Religion and Morals, and Society—opens with a series of questions about the scope, history and identity of philosophy: What are the practical uses of philosophy? Does the discipline, begun in the West in ancient Greece with Socrates, favor men and exclude women? Does the history and study of philosophy betray a racial bias against non-white thinkers, or geographical bias toward the West? These questions and others form a foundation for readers as the book moves to the second section, Science, where some of our most urgent contemporary philosophical debates are taking place. Will artificial

intelligence compromise our morality? Does neuroscience undermine our free will? Is there a legitimate place for the humanities in a world where science and technology appear to rule? Should the evidence for global warming change the way we live, or die? In the book's third section, Religion and Morals, we find philosophy where it is often at its best, sharpest and most disturbing—working through the arguments provoked by competing moral theories in the face of real-life issues and rigorously addressing familiar ethical dilemmas in a new light. Can we have a true moral life without belief in God? What are the dangers of moral relativism? In its final part, Society, The Stone Reader returns to its origins as a forum to encourage philosophers who are willing

to engage closely, critically and analytically with the affairs of the day, including economic inequality, technology and racial discrimination. In directly confronting events like the September 11 attacks, the killing of Trayvon Martin, the Sandy Hook School massacre, the essays here reveal the power of philosophy to help shape our viewpoints on nearly every issue we face today. With an introduction by Peter Catapano that details the column's founding and distinct editorial process at The New York Times, and prefatory notes to each section by Simon Critchley, The Stone Reader promises to become not only an intellectual landmark but also a confirmation that philosophy is, indeed, for everyone.

With this resource, speech-language pathologists (SLPs) and audiologists will learn to apply best evidence as they make critical decisions about the care of each individual they serve. The first to cover this important topic for the field of communication disorders, this book introduces SLPs to the principles and process of evidence-based practice, thoroughly covering its three primary components: external evidence from systematic research, internal evidence from clinical practice, and evidence concerning patient preferences. Developed by Christine A. Dollaghan, a researcher in the field of language acquisition and disorders, this book makes complex concepts understandable with its clear, reader-friendly language; vivid step-by-step examples of key processes; and illuminating figures and tables. Readers will come away with a solid, practical understanding of evidence-based practice - knowledge they'll use throughout their careers to make sound clinical decisions about the screening, diagnosis, and

treatment of communication disorders.

Criminologist Anthony Meoli said Sondra London broke ground in publishing the confessions of serial killer Danny Rolling. But only part of that story could be told in 1996. Now in this unique new volume, the controversy surrounding The Making of a Serial Killer is revealed in a series of interviews and appearances including NBC Dateline, Court TV, talk radio and courtroom drama. Meoli shows off Rolling's art, with a stunning painting Rolling called his Masterpiece and his handwritten explanation of its symbolism. Podcasters Dan Zupansky (True Murder) and Ariel Cooksey (Malice) share thought-provoking conversations that elicit new revelations about London's work with Rolling. And a sensational secret interview with

This book is an analysis of literary texts that question,

critique, or subvert anthropocentrism, the notion that the universe and everything in it exists for humans. Bryan Moore examines ancient Greek and Roman texts; medieval to twentieth-century European texts; eighteenth-century French philosophy; early to contemporary American texts and poetry; and science fiction to demonstrate a historical basis for the questioning of anthropocentrism and contemplation of responsible environmental stewardship in the twenty-first century and beyond. *Ecological Literature and the Critique of Anthropocentrism* is essential reading for ecocritics and ecofeminists. It will also be useful for researchers interested in the relationship between science and literature, environmental philosophy, and literature in general.

This book offers a novel

understanding of the epistemological strategies that are mobilized by the essay film, and of where and how such strategies operate. Against the backdrop of Adorno's discussion of the essay form's anachronistic, anti-systematic and disjunctive mode of resistance, and capitalizing on the centrality of the interstice in Deleuze's understanding of the cinema as image of thought, the book discusses the essay film as future philosophy-as a contrarian, political cinema whose argumentation engages with us in a space beyond the verbal. A diverse range of case studies discloses how the essay film can be a medium of thought on the basis of its dialectic use of audiovisual interstitiality. The book shows how the essay film's disjunctive method comes to

be realized at the level of medium, montage, genre, temporality, sound, narration, and framing—all of these emerging as interstitial spaces of intelligence that illustrate how essayistic meaning can be sustained, often in contexts of political, historical or cultural extremity. The essayistic urge is not to be identified with a fixed generic form, but is rather situated within processes of filmic thinking that thrive in gaps.

The essays in this edited volume, written in English and French, tackle the intriguing problems of fear and safety by analysing their various meanings and manifestations in literature and other narrative media. The articles bring forth new, cross-cultural interpretations on fear and safety through examining what kinds of genre-specific means of world-making narratives use to express these two affectivities. The articles also show how important it is to study these themes in order to understand challenges in times of global threats, such as the climate crisis. The main themes of the book are approached from various theoretical perspectives as related to their literary and cultural representations. Recent trends in

research, such as affect and risk theory, serve as the basis for the discussion. The articles in the volume also draw from disciplines such as gender studies and trauma studies to examine the threats posed by collective fears and aggression on individuals' lives and propose ways of coping with fear. These themes are addressed also in articles analysing new adaptations of old myths that retell stories of the past. Many of the articles in the volume discuss apocalyptic and dystopian narratives that currently permeate the entire cultural landscape. Dystopian narratives do not only deal with future threats, such as totalitarianism, technocracy, or environmental disasters, but also suggest alternative ways of being and new hopes in the form of political resistance.

Umbr(a): Writing BoD - Books on Demand

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers?

Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar

care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

The Big Data-Driven Digital Economy: Artificial and Computational Intelligence

A great American writer's confrontation with a great European critic—a personal and intellectual awakening A hundred years ago, the Viennese satirist Karl Kraus was among the most penetrating and farsighted writers in Europe. In his self-published magazine, *Die Fackel*, Kraus brilliantly attacked the popular media's manipulation of reality, the dehumanizing machinery of technology and consumer capitalism, and the jingoistic rhetoric of a fading empire. But even though he had a fervent following, which included Franz Kafka and Walter Benjamin, he remained

something of a lonely prophet, and few people today are familiar with his work. Luckily, Jonathan Franzen is one of them. In *The Kraus Project*, Franzen, whose "calm, passionate critical authority" has been praised in *The New York Times Book Review*, not only presents his definitive new translations of Kraus but annotates them spectacularly, with supplementary notes from the Kraus scholar Paul Reitter and the Austrian author Daniel Kehlmann. Kraus was a notoriously cantankerous and difficult writer, and in Franzen he has found his match: a novelist unafraid to voice unpopular opinions strongly, a critic capable of untangling Kraus's often dense arguments to reveal their relevance to contemporary America. While Kraus is lampooning the iconic German poet and essayist Heinrich Heine and celebrating his own literary hero, the Austrian playwright Johann

Nestroy, Franzen is annotating Kraus the way Kraus annotated others, surveying today's cultural and technological landscape with fearsome clarity, and giving us a deeply personal recollection of his first year out of college, when he fell in love with Kraus's work. Painstakingly wrought, strikingly original in form, *The Kraus Project* is a feast of thought, passion, and literature.
