million men served

in the German army - das Heer. The bulk of these men were infantrymen, who slogged their way, mostly on foot, from Finisterre to Moscow, Kirkenes to Tripoli. They swore unlimited obedience to Adolf Hitler and were ready to stake their lives for this oath: over 1.6 million men of das Heer were killed during the war and over 4.1 million were wounded.

Everything you need to know to restore or customize your classic Japanese motorcycle. Whether you want to correctly restore a classic Japanese motorcycle or create a modified, custom build, you need the right information about how to perform the mechanical and cosmetic tasks required to get an old, frequently neglected, and often long-unridden machine back in working order. *How to Rebuild and Restore Classic Japanese Motorcycles* is your thorough, hands-on manual, covering all the mechanical subsystems that make up a motorcycle. From finding a bike to

planning your project the blue-chip to dealing with each Japanese mechanical system, How to Rebuild and Restore Classic Japanese Motorcycles includes everything you need to know to get your classic back on the road. Japanese motorcycles have been the best-selling bikes in the world since the mid-1960s, driven by the "big four": Honda, Yamaha, Suzuki, and Kawasaki. Of course certain bikes have always had a following - Honda CB750, 305 Hawk, CB400-4, Benly; Suzuki GT750, Katana, GS1000S; Yamaha XS650, RD400 Daytona, TZ; Kawaski H1, H2, Z1R - and these have now become

the blue-chip Japanese bikes leading collectors to seek out more common (and now more affordable) alternatives. This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.

This book is the third in the Redline books Enthusiasts Series. It tells the story of one of Italy's premiere post-war marques. With a history steeped in

aviation, including the MC72 World Speed Record holder and World War II fighters, Aermacchi began building motorcycles in 1950. At the 1956 Milan Show, the futuristic Chimera, an ohv horizontal single with enclosed bodywork was launched. Later in the decade the Chimera was 'undressed' to create some of Italy's best sports and racing machines, including the Ala Verde and the Ala d'Oro. In 1960 Harley

Davidson bought 50% of Aermacchi, and then in 1978 the Varese factory was sold to Cagiva. A number of Aermacchi personalities have contributed to this book, giving it additional authority.
