## The Prehistoric Maritime Frontier of Southeast China

J. Ross Publishing  
In this accessible new study, Toby Lincoln offers the first history of Chinese cities from their origins to the present. Despite being an agricultural society for thousands of years, China had an imperial urban civilization. Over the last century, this urban civilization has been transformed into the world's

largest modern urban society. Throughout their long history, Chinese cities have been shaped by interactions with those around the world, and the story of urban China is a crucial part of the history of how the world has become an urban society. Exploring the global connections of Chinese cities, the urban system, urban governance, and daily life alongside introductions to major historical debates and extracts from primary sources, this is essential reading for all those interested in China and in urban history.

poetry of subtlety, wit, and feeling. This study examines the latter as a response to the options available to a late-eleventh century writer in the pentametrical and heptametrical forms of Ancient Verse, Regulated Verse, and Quatrains. Numerous comparisons are made with Su Shi, Huang Tingjian, Du Fu, and other important writers. In a major advance over previous methodologies, the author uses a clear system of metrical notation to show how sound patterns reveal the poet's artistic and emotional intentions. This innovation and the author's other meticulous explorations of He Zhu's artistry allow us to experience Chinese poetry as never before. From the reader's report: "not just an excellent study of an individual poet but also a model of reading the language of classical Chinese poetry. [...] opens up a world of interpretive territory heretofore seldom explored."

The Chinese city of Yangzhou has been of great cultural significance for many centuries, despite its destruction by invaders in the 17th and 19th centuries. It was a site of virtual pilgrimage for aspiring members of the Chinese educated class during the Ming and Qing periods. Moreover, because it was one of the foremost commercial centres during the late imperial period, it was the place where the merchant and scholarly classes merged to set new standards of taste and to create a cultural milieu quite unlike that of other cities, even other major centres in the region. The luxurious elegance of its gardens and the

eminence of its artistic traditions meant that Yangzhou set aesthetic standards for the entire realm for much of the late imperial age. Over the years, particular regional forms of art and entertainment arose here, too, some surviving into the present time.

This ethnography explores contemporary narratives of "Han-ness," revealing the nuances of what Han identity means today in relation to that of the fifty-five officially recognized minority ethnic groups in China, as well as in relation to home place identities and the country's national identity. Based on research she conducted among native and migrant Han in Shanghai and Beijing, Aqsu (in Xinjiang), and the Sichuan-Yunnan border area, Agnieszka Joniak-Luthi uncovers and discusses these identity topographies. Bringing into focus the Han majority, which has long acted as an unexamined backdrop to ethnic minorities, Joniak-Luthi contributes to the emerging field of critical Han studies as she considers how the Han describe themselves - particularly what unites and divides

them - as well as the functions of Han identity and the processes through which it is maintained and reproduced. The Han will appeal to scholars and students of contemporary China, anthropology, and ethnic and cultural studies.
